TRAINING TOPICS

DAY ONE (Tuesday)

Day one of this three day training is being presented by International Game Technology (IGT) at the request of the Chitimacha Tribe of Louisiana.

The IGT Agenda (as provided by IGT) is attached. Please note that the Registration for the IGT Training on Tuesday is scheduled for Monday evening, April 14, 2014, 6:00 PM to 9:00 PM.

The National Indian Gaming Commission (NIGC) is not endorsing the IGT Training nor are we promoting IGT. We are providing this information as a courtesy to the Chitimacha Tribe, our host for this training event.

Opportunity Knocks

Immerse yourself in specialized, professional training. Specifically tailored for tribal regulators, tribal councils, and tribal compliance officers. Taught by the industry leader. At no charge to you.

This IGT Knowledge Share track covers information that is critically important to regulators. For example, some of the coursework topics include:

- New products
- Information resources
- IGT Advantage® System
- IGT sbX® System
- Shipping requirements
- EGM platforms and components (with hands-on instruction)
- PAR sheets and PSRs
- Game play

This is an intense course developed to educate inspectors and regulators on specific aspects of the newest gaming technologies and methods needed to maximize operational integrity.

Cypress Bayou Casino, Charenton, LA
Registration: Monday, April 14 – 6 pm to 9 pm
Training: Tuesday, April 15 – 8 am to 5 pm

DAY TWO (Wednesday)

E206 - Gaming Forensics – This course explores various strategies, best practices, and other guidelines available for regulators and other tribal gaming personnel in dealing with equipment malfunctions and thefts.

A260 - IT MICS in the Server Based, Server Assisted and Remote Gaming Environment – This course will discuss the role of MICS in addressing risks present in a server-associated environment. At a general level, the functionality of the systems will be reviewed with emphasis on why the IT department is now moving onto the gaming floor. Furthermore, the need for strict controls over access by external parties, particularly remote access, will be highlighted. Attendees will gain an enhanced appreciation for the heightened level of risk associated with server-based, server-assisted and remote gaming.

DAY THREE (Thursday)

E206 – Resources for Tribal Gaming Regulatory Authorities – This course will explore the general testing process of gaming and associated equipment, highlight common issues faced by gaming regulators, and share strategies on effectively regulating gaming technology.

A230 – Drop and Count - This presentation will discuss the MICS specific to the drop and count process. Topics will include, but not be limited to: table games drop and count procedures, soft count personnel and count room inventory controls (including interim transfers), gaming machine drop and count procedures, key controls (including computerized systems), and emergency drop procedures. Case studies will be reviewed based on the experience of the NIGC Audit Division of how deficient internal control systems have contributed to the occurrence of irregularities. Attendees will gain an enhanced understanding of the inherent risks associated with the drop and count process and how the MICS are intended to mitigate those risks.
