Comments on the draft of 25CFR Part 559

I think the information required for opening a new facility is appropriate especially since the information required seems to be answers to IRS audit checklist.

The time limits for requests are very tolerable also.

The attestation by the tribe as to certifying the protection of the environment and public health and safety is an agreeable requirement. We have written a policy and training plan for our employees to this issue.

Thank you for allowing me to comment

Keep up the great work, it seems the relationship between the tribes and the NIGC continues to improve
