Page 2

CHAIRWOMAN STEVENS: Good morning. If I could have everyone take their seats, we'll go ahead and get started. I apologize for the delay in getting everybody through the line.

Okay. Before we begin, I'd like to turn over the microphone to Governor Anoatubby of the Chickasaw Nation.

2.

2.2

2.5

BILL ANOATUBBY: Good morning,
everybody. It's a great day to be here in
Oklahoma at Riverwind. I'll take this
opportunity to welcome everybody to this
facility, to this consultation, and particularly
a place to welcome the commissioners of the
National Indian Gaming Commission. Let's give
them a nice welcome.

I think they've set a direction here that's very important to all of us, to Indian Country, to the commission by coming to tribal facilities, and to come to the tribal facilities and consult, and I think that's certainly an important thing, and I think it's a move most certainly in the right direction.

I won't take too long because I know that you have some very important business to do here. I'm a pre-IGRA tribal leader, and I'm

sure there's some other folks in this room that were here before the Indian Gaming Regulatory I remember when we were doing, quote, "bingo," the kind where you move the slots over and you dot the paper or whatever, and we still do that, and our credibility was questioned, was questioned by people around us. In fact, we had some confrontations with some of the local law enforcement over bingo.

When IGRA was passed, a lot of that was still confrontational, but not quite the same There was a question about the legitimacy of gaming in Oklahoma particularly, and IGRA changed a lot of that, and we had the National Indian Gaming Commission there to help regulate. That was the primary regulation followed by the Even though it was legitimate before, tribes. it's added a level of legitimacy. It's made our life better.

Now, there's a fine balance that we have to achieve when it comes to regulation. important that we protect the interests of the tribes. It's important that we protect the interests of our patrons, and you could go too far either way. You cannot have enough

1

12

13

14

15

16

17

18

19

20

21

2.2

23

24

regulation or you could have too much. I think it's important that we work together such as we will be doing today to help achieve that balance, to reach that mission of -- the tribes rely upon the gaming dollars. It's important, very, very important. Tribal government is important, being able to have a good solid foundation, a good financial foundation, but also, and I guess maybe even more important is the services that we provide as a result of the gaming dollars.

2.

2.2

2.5

So this is a very, very important meeting that we're having here today, and I think it's important that we apply ourselves to do the kinds of things that we need to do to protect the interests of our people, of our credibility, and to achieve that balance that we so desire.

And, again, thank you very much for being here.

The Chickasaw Nation is honored and is very privileged to be here having this meeting today, and we also feel privileged and honored that we have this group of tribal readers and tribal representatives here in our facility. Thank you very much.

CHAIRWOMAN STEVENS: Thank you, Governor

Anoatubby. On behalf of the National Indian Gaming Commission, we want to welcome everybody and tell you my name is Tracie Stevens. I'm a member of the Tulalip Tribe. I'm the chairwoman of the National Indian Gaming Commission. I do want to extend my sincere appreciation and the appreciation of the entire commission and the agency for the Chickasaw Nation hosting this consultation.

2.2

2.4

2.5

You know, before the meeting we were having a little chat with the governor, and he was saying what an honor and privilege it was for us, for the Chickasaws to have us here, and really the truth is it's really a privilege and an honor for us to come into your home land, into your territory, and have you welcome us in your home. So thank you very much for hosting. This is a fabulous facility, and I understand you have many others, and the invitation has been extended to us to visit others, which we hope we can do in our time in office.

I also want to recognize Vice-Chairwoman Stephani Cochran, who is to my left, who is a member of the Chickasaw Nation. We're in her home, and also Dan Little who is the associate

Page 6

commissioner. You'll be hearing from both of them in just a moment. Also I want to recognize our staff who we have here. Over at the end of the table is Lael Echo-Hawk. She is the Counselor to the Chair, and she'll be facilitating the meeting as we go through it.

2.2

2.5

Also from the Oklahoma office, many of you know the staff that are here. We have Tom Cunningham who is the R.D. He's right back here. Y'all know him. Tony Wheeler, field investigator, is back around there somewhere. Dana Freeman, also a field investigator, is at the table. Christie Jamison, who is an administrative assistant.

From our Tulsa office we have Tim Harper who is back here next to our transcriptionist, and Marci Ober. I'm sure she's here. So they're here and available if you need to chat with them, but I do want to recognize them because they've been preparing for this meeting and as you saw signing everybody in. Before we move forward with the meeting, I do want to reiterate many of you heard this commission talk about our four major initiatives, and will be the focus of our time in office. We have four major

initiatives, and I'll name them quickly and just go over them and talk about how they pertain to what we're doing today.

Our first priority is consultation and relationship building. We understand and we have heard some criticism from tribes rightfully so about the NIGC past practices, and in keeping with President Obama's direction to all executive agencies to have meaningful dialogues with tribes and consultations and collaboration with tribes, we're going to be performing our consultations differently than previously has been done.

As you see, this is an open format so that we can hear all of the tribes' concerns and priorities, and also provide an opportunity for tribes to give us some solutions together, and just after three consultations last week on the west coast, we are seeing that there are different priorities for tribes or different views from different tribes in different regions naturally because, you know, gaming is different for tribes in various regions.

So this also provides -- not only do we get to hear your concerns, and we've heard some

1

2.

3

4

5

6

8

10

11

12

13

14

15

16

17

18

19

20

21

2.2

23

2.4

tribes who really appreciate being able to hear the concerns of other tribes because they thought maybe they were the only ones who had a concern about something, but also afford everyone the opportunity to provide some solutions that would help all the tribes at the table.

2.2

2.4

2.5

So this is an open forum. We do have tribal leaders right around us here. If there are any other tribal leaders that are a little shy back there, we do have a few seats right up here with us, but it's intended to give you the floor today to tell us what your priorities are.

Now, before I move on, our other major initiative -- I do want to say that as this is different from our previous consultation formats, the individual meetings, we certainly don't expect tribal leaders or tribes to have to talk to us in this open forum about their specific tribal issues, whether it's a regulatory body or operational concerns, any issues you might have that's only specific to your tribe.

We do meet with tribes outside of these meetings at tribal request. We do make

ourselves available, but we certainly don't expect nor do we want you to feel like you have to air your particular tribe's issues here, just so you know that, but generally with this new consultation format, it is meant to be collaborative. It is meant for all of us to work together on common ground, and work to a common goal.

2.

2.2

2.4

2.5

Our second initiative is technical assistance and training, and that is statutorily mandated as many of you know, but it should be more than that. We should be trying to improve regulatory oversight from the primary regulator standpoint. What can we be doing to help tribes better protect gaming operations and to align our program to the needs of the tribes?

Now, this is something that Stephani Cochran is heading up for the commission, and there is a survey out that was posted last Thursday on our website asking tribes and regulators and operators what training do you need and what improvements can we make so you can create a better catalog that fits the needs of the tribes.

So that's out, and within 24 hours last

1 Friday, we had 30 responses just within 24 hours. So I encourage everybody to go online. It was e-mailed, we faxed it, we put a press 3 release out, it's on the website so you can fill 4 5 it out on our website and send it in. So please do participate in that particular survey so we 6 7 can get a better gauge of what it is that you need from us. The third initiative, agency 8 operations review. We're doing an internal 10 review of our operations in the agency. 11 Management of the agency, the organization and 12 structure of the agency, budgeting for the 13 agency, and trying to create some accountability 14 or some transparency to tribes because if we're 15 really concerned about how you're running your 16 operation, you should be really concerned about 17 how we're running our operation, and that you 18 should know that good practice, good government 19 is to allow the public, you, who we serve to 20 know how we're conducting our business. 21 And the final one, which is the topic of

And the final one, which is the topic of today's consultation is regulatory review.

During my nomination process, I committed to doing sort of an overview of the current regulations and examination of past regulations

2.2

23

24

2.5

that were in effect, to look at the relevance of regulations as we come into office, and that's what we're doing. That's the discussion of today's topics.

23

24

2.5

I do want to say this is not intended to be a line by line drafting session, but more over priorities, which regulations in what order, what level of priority, and how should we go about addressing regulatory change or improvement, and we want to have tribes help us set this agenda and set the priority. We don't want to be off doing something that's not really helpful to you or to the industry. You should have a say right from the beginning about what we're doing, and some of the regulations will be sort of a bigger item to get your arms around like the MICS. Others may be smaller that we can make some technical changes to and move through quickly, but we will be having a transparent process. We want to hear from you today, what your priorities are in terms of regulatory review, or any changes that need to be made so we know where to focus our attention, because after all, we're only here -- this commission technically will only be here for

another two and a half years, less time for Vice-Chairwoman Cochran who's already been in office for a year. I was the last one to come in, so I'm going off of the far end of the time that we have, and so setting priorities is important for us, and your inclusion in those priorities is incredibly important to us so that we stay focused.

Before we move on to the rest of the comments and Lael actually, I will turn the microphone over to the other commissioners.

VICE-CHAIRWOMAN COCHRAN: Good morning.

Can you hear me? I'm going to stand up because

I'm not a very tall woman. I can't see you.

Governor Anoatubby, thank you for allowing us to

come out and make us feel so welcome. Thank you

for that. There's many chiefs here, many other

governors and chairmen and tribal leaders, and

it's also an honor and privilege for me to

address you. I hope to be a good listener.

There's many experts in this room. The Oklahoma

tribes here have so much expertise in gaming,

and we hope to be good listeners and hear what

your needs are, and so I hope to be a good

listener to you today.

800-227-8440

2.2

Finally, it's always good to be home. This is home. I live in D.C. now. It's my second trip. It's very different, so it's nice to be home. Chairwoman Stevens and Commissioner

Little are amazing people to work with. They have a lot of great ideas. They have a lot of inspirational commitment to the well-being of gaming. It's quite a privilege also to serve with them as well, so thank you for allowing us to be here, and I'll turn it over to Mr. Little.

2.

2.2

2.5

ASSOCIATE COMMISSIONER LITTLE: Good morning, everyone. I just want to be very brief. We are very happy to be here. Governor, thank you for the hospitality. This is a wonderful place, beautiful hotel. If you haven't stayed here, I strongly recommend it. I just want to talk about the NOI very quickly. The questions that are in the NOI are derived from, you know, our staff, the commission, tribal leaders, and one thing I want you to remember as we go through this is that these are just questions.

Also if there's a particular issue, regulatory related issue that's not covered, then bring it up. So as we go along, I'm very

Veritext/NJ Reporting Company 973-410-4040

interested in hearing from the tribes. So once again, thank you for the invitation to come out here. I'm very happy to be here and look forward to hearing from all of you. Thank you.

2.

2.5

CHAIRWOMAN STEVENS: Thank you, Stephani and Dan for your comments, and I also want to recognize former commissioners that are here, like Liz Homer is here, and before I turn it over to Lael, again, I want to reiterate that today is for us to hear from you. Lael will go through just sort of a 30,000 foot review of the NOI, but we're doing this so that we can talk about the need for changes with regard to tribal priorities, and to talk about that, talk about those priorities before we initiate the meeting. This is a new mechanism for this agency, and Lael will talk about that more, but we do want to hear from you today.

Again, welcome. We look forward to your comments, you know, and even if you have some comments about this process, we'd like to hear from you. We were trying to be as inclusive as we could and also to be respectful to tribes by giving the floor the majority of the day to tribal leaders, and to just open it up. We had

one person in one of the consultations say that they prefer to go line by line in the Notice of Inquiry, but we also appreciate that tribal leaders have very, very busy schedules, far busier than ours will ever be because you have to take care of an entire community and an entire government, and oftentimes tribal representatives or leaders will come and just provide their comments and go on with the rest of their day, and so we do keep it open for flexibility, but if you do have comments on this process or changes or improvements you'd like to see, we certainly are open to those. So, again, we look forward to working collaboratively together to set this agenda, and we look forward to your comments. I'm going to turn it over to Lael who is down here on the right or my right to bring you through an overview of the Notice of Inquiry.

2.4

2.5

LAEL ECHO-HAWK: Good morning. Can everyone hear when everyone was talking? Okay. Good. Thank you. My name is Lael Echo-Hawk. I am a member of the Pawnee Nation of Oklahoma. I'd like to acknowledge President Howell from the Pawnee Nation. I appreciate him coming down

here. I'm very happy to be in Oklahoma. This is stop four on our tour with the commission.

We keep joking that we're going to get tour t-shirts or something. I haven't seen them so far. We'll see what happens, but, again, thank

you all for coming.

2.2

2.5

I'm going to run really quickly through this so that we can get to your comments. The e-mail, and you'll see this at the end as well, but I emphasize the e-mail address reg.review@nigc.gov. This is where you can send comments throughout this process. You can send us comments, substantive comments about the NOI. That is the best way to contact me directly about the regulations and the NOI review.

So why regulatory review? IGRA obviously requires that the NIGC enact -- put together some regulations in order to implement the act. Additionally there are some requirements such as the Executive Order "Regulatory Planning and Review" and the Regulatory Flexibility Act. They require administrative agencies to put together an administrative or a regulatory review every year, and it's been on a semi-annual basis. So realizing that, we

thought this would be a good opportunity for us to come out into Indian Country and take a look at our regulations and set the agenda that will come out in April.

2.2

2.5

Consultation, as the chairwoman indicated, consultation is very, very important to this agency. It's our number one priority, and we firmly believe and support President Obama's mandate that we consult with tribes meaningfully and engage in dialogue before we make a decision that will affect this industry.

One of the sections of the consultation

Executive Order, Section 3(c)3, says that even

before -- before we determine whether or not to

set federal standards, that the agency shall

consult with tribes and to listen, help us make

decisions based on input that we receive from

you, and this is something that's been very

important to the commission, and it's what the

intent of this Notice of Inquiry is.

So what is a Notice of Inquiry? It's a tool used by a number of administrative agencies.

I've never seen it used in the context of an agency consulting with tribes, but it is something that's used often by other

administrative agencies like the Federal

Communication Agency -- or Federal Communication

Commission, the copyright office, et cetera, and

what it does is it puts some questions out to

the individuals or industries affected by these

regulations, and it says, okay, we've heard some

issues. We've heard some concerns. Give us

your feedback so we can figure out which

direction we need to go, and it's really a way

to solicit some input, some guidance before we

move forward drafting regulations or policies.

2.

2.2

2.5

So this NOI asks three primary questions:
What regulations, in what order, and how do we
do it. So we're on stop number four. We're
here in Oklahoma. Later on this week we'll be
in Albuquerque, and then we go to D.C. next
week. The following week we'll be in South
Dakota and Florida, but we really wanted to make
sure that we hit all the regions as we travel,
and we came out into Indian Country.

The NOI published November 18th. The comment period closes on February 12. That's a Saturday, but that's the last day. It's an 86-day comment period. You can, again, get your comments to us any way you need to. You can

Veritext/NJ Reporting Company 973-410-4040

e-mail, you can fax, you can snail mail, pony express, smoke signal, whatever you need to do. We really want your comments, so please get them to us.

2.

2.2

2.4

2.5

All written comments and the consultation transcripts are going to be posted on the website. I've already received one transcript from the transcriptionist from one of last week's meetings, and so I anticipate by the end of this week, we'll have one or two of those transcripts on the website. You can go take a look at those. There are a few comments already posted, but as soon as they come in, we get them on the website so everyone sees what other people are saying and where the comments are going.

So as I go quickly through the substance of the NOI, something that's important to remember as Commissioner Little mentioned as well is these are suggestions only. These are issues that we've heard and topic areas that we've heard as we were consulting over the summer as we had individual meetings with tribal leaders and commissioners in our offices or at various conferences, but these are not issues that the

973-410-4040

commission has taken a position on. That's why we're here. We're here to ask you for some assistance in setting the priorities and coming up with a plan for how we move forward in revising any of these regulations.

2.2

2.5

So the NOI goes through a number of sections. Part 502, which is the definition section, including looking at the definition of net revenues, management contracts. We've heard some comments about the net revenues definition, and some thought is going into whether or not we need to revise or take a look at the use of net gaming revenues bulletin that was issued in 2005, and so it's something we're looking for some input from tribes on.

The fees section, there's a couple of things in there that we looked at or that we heard about including a certain ticketing system in lieu of NOVs, when late fees are issued. The self-regulation regulation. I like saying that. It's whether or not the burden of getting a self-regulation certificate is worth sort of the benefit and we've heard quite a bit about those over the past three meetings. Part 523, we've heard that that is obsolete and maybe should be

800-227-8440

just be removed entirely. Management contracts is a very big issue and we've heard a number of comments about these particular sections, and look forward to any comments that you might have as well.

2.2

2.5

Proceedings before the commission. One of the other concerns we've heard is that there's some concerns about due process and about the length of time it takes for someone when they're filing an appeal before the commission, and whether or not we should draft regulations that provide some clear guidance on that process and how it should work and how much time it should take.

The big issue, the hot issue is the MICS, Class II, Class III, the technical standards. What should the commission do with the Class III MICS that are now regulatory form in spite of the fact that IGRA never gave the NIGC authority to enforce or promulgate Class III regulation? They are in regulation form now. We need to figure out what to do with them and whether or not we update them. Class III MICS is a very big issue. Class II MICS as most of you know, there was a tribal advisory committee that was

reviewing Class II MICS and technical standards over the past couple of years, and it's sort of out there pending. What do we do with that current draft of regulations? So that's the issue that's gotten the most attention over the past couple of years, but it certainly is not the only issue that this commission wants to address over the next couple of years.

2.

2.2

2.5

The pilot program for background investigations for licensing, a number of tribes here in Oklahoma participate in that program, and we've heard -- our staff thought that it might make some sense to put that into a regulation form. Allowing access to tribes for fingerprinting for non-primary management official or key employees. Just access to the fingerprinting process that we have.

Part 559, the facility licensing regulation, that's something that we've heard at every meeting needs to be looked at, and perhaps reopened and reconsidered again. Access and inspection of records that may be held off site. For example, management companies often have records from a tribal facility at their location that are not necessarily a tribal facility, and

we've heard that perhaps we need to clarify that the NIGC has the authority to subpoena those records at the request of tribes or at the request of the NIGC.

Enforcement proceedings, we've heard a number of concerns about these regulations including whether or not the chairwoman should have the authority to withdraw an NOV after it's been issued.

So those are sort of the regulations that are currently in our regulations and our structure. We have a couple of other things that kind of came up and may or may not end up as new regulations. Again, looking for some input from tribes. That includes the Tribal Advisory Committee or other methods to include tribal comments when drafting a regulation. As you know, the Tribal Advisory Committee process has been sort of controversial in the past couple of years, and we want to figure out a way to make sure that tribal input is included in a meaningful way, that it's done fairly, and that when that input is received, that it is representative of the industry and the tribes around the country.

1

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

2.2

23

24

Sole proprietary interest. This is something that's come up before the commission very frequently lately. We've had a number of tribes coming to us asking us to make a determination about whether or not a contract or a number of contracts violate sole proprietary interest provisions of IGRA, and it's a good question, and we need to figure out a way to address that issue in a way that assists tribes, provide some clarity to vendors and contractors as they come in, and that may also include a definition of primary beneficiary. That's a comment that we heard in San Diego. So that's something that we're also taking a look at.

2.

2.2

2.4

2.5

Communication process policy. One of the concerns that we hear, and we really try very hard putting out this NOI to communicate as broadly as possible press releases, mail, tribal leader letters, e-mail, putting things on the website, but how do we communicate with you and who do we communicate with? I worked at a tribe for six and a half years before moving to Washington, D.C., and I know that a lot of times tribal leaders' mail gets -- things sort of get lost in the mail or things that come to the

Veritext/NJ Reporting Company 973-410-4040

973-410-4040

gaming commission may not make it to the tribal council or vice versa. We want to make sure that every person at your tribe who needs to know what's going on at the commission has that information, and so how do we do that? So that's something that we really would love to hear from tribes on because we want to make sure that we're communicating with you in a meaningful way.

2.2

2.4

2.5

The Buy Indian Act, most you I'm sure know that the industry, the gaming industry, there's a movement for tribal gaming facilities to buy products from each other, and when it comes to procurement and the federal government, we thought it might be a good idea to formalize this into a regulation much like HHS has done.

So once again these are only suggestions. The commission hasn't taken a position on how we're going to do this, on which direction we're going to go, and we really, really are looking for input from you. One of my concerns is, I've sort of been taxed with heading this process up, is how do we address all of the issues that were raised in the NOI or other issues that might be raised by tribes? How do we address all of

800-227-8440

those without getting bogged down in the MICS? So if you have some thoughts about that, please let us know. We're committed to this process, and we want to make sure that we get as much done in this short amount of time that we have as possible. We want to make sure that we can accomplish a lot, and we don't want to get bogged down on one issue over another even though the MICS, for example, is a very important issue.

So going back to the executive order, same section, (c)3 or (c)2, I guess, says that where possible, the agencies shall defer to tribes to establish standards. That's something that we've really been looking at and considering that if tribes submit some sort of alternative to a regulation to us, then we have to defer to them. That's Executive Order 13,175. So we are looking for that from tribes as well.

So, finally, comment period closes on February 12th. Everything is going to be posted online. The commission is really dedicated to accountability or transparency, openness so that everything that we have that pertains to this issue is going to be on the website. If you go

1

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

2.2

23

24

to the nigc.gov website, on the left-hand side, there's a button called Tribal Consultation. If you click that, it goes to another button called Regulatory Review. When you click that button, everything related to this process is on there, all the press releases, the notice of inquiries, the agenda for this meeting, the PowerPoint for this meeting, comments received, transcripts from these hearings, everything will be online. So please go there and review that information.

Again, you can send comments to reg.review@nigc.gov, and that goes straight to me. So the commitment by the commission and by myself, every comment that's received will be looked at and evaluated. We take very seriously the things that we hear from Indian Country.

The regulatory agenda does come out in April. It will include sort of like a preamble or an explanatory statement identifying how we came up to the decisions that we came to. You know, if we disagree about some comments that tribes gave some input regarding which, you know, priority or which regulations to address first or et cetera, we'll have an explanation there for why we took the direction that we did.

2.2

2.4

Again, this is trying to be as open and accountable to the industry and to tribes as possible.

2.

2.2

2.4

2.5

The agenda will be finalized in April.

You'll likely hear about it at the NICA annual meeting. Then that's when the substantive work really begins. That's when we begin going line by line and taking a look at the regulations and doing the substantive work to get these regulations updated and address some issues that have been pending for a while.

So logistically these consultations are being reported and transcribed, so that means we need everyone who speaks to speak into a microphone. Please state your name and the tribe or organization that you represent. If we can't hear you, you will probably be asked to restate your name. We have a microphone here. We have a microphone -- two microphones at the table. So this microphone, I'll have it over here, so people in the audience, if you want to make some comments, the microphone will be up here so that you can do that, and we can make sure that it's recorded. So other than that, we will turn the microphone over to you.

Veritext/NJ Reporting Company 973-410-4040

STEVE ORTIZ: Hi. I'm Steve Ortiz. the chairman of the Prairie Band Potawatomi. take it at this point after reading your post in the Federal Register, all the comments that you made in the Register, I would just like to point out that it just seems that we need to begin by deciding what the Tribe Advisory Committee is going to be because your actions in here speak of Tribal Advisory Committees. My experience in the past over about the past 13 years with Indian agencies is that with the Interior and HHS, they usually have representatives from each of their regions. They usually have a primary and an alternate and take that on to be their primary focus for these Tribal Advisory Committees. So this way there's inclusion of everybody. In the past, there's only two or three. That's not enough inclusion. So I think we need to begin a discussion on the selection of the Tribal Advisory Committee and how that will be established. Thank you. CHAIRWOMAN STEVENS: Thank you. We may

have to turn this microphone down. We've actually heard from other areas that actually brought up the, and many of you may be aware,

those that are self-governance tribes, the 1 2. Tribal Budget Advisory Committee, TBAC. The BIA uses that, and also DOI has it in their 3 consultation team. They follow a similar model 4 5 where it's left to the regions to decide who will represent their region, and there's no 6 7 dictating to the region how they select someone and their alternate. We don't get in there and 8 decide for you. That's been one suggestion, and it sounds similar to what you were mentioning to 10 11 the chairman. We're open to comments on tribal, 12 you know, how to construct them, when to use 13 them. Sometimes we may not need to use them. 14 How do we bring in industry experts? Any other -- and I do want to defer to tribal leaders 15 16 first just out of respect for their positions 17 and their time today.

ASSOCIATE COMMISSIONER LITTLE: Just a follow-up. One of the other I think kind of issues that has -- I don't want to say the commission stumble on is the advisory committee and how do we also make sure that different segments of the industry are represented, whether it be Class II or Class III because just having someone from a region may miss a segment

18

of that, so, I mean, it would be interesting in asking that question and any kind of ideas on that.

2.2

2.5

TOM GAMBLE: Thank you. I'm Tom Gamble with the Miami Tribe of Oklahoma, and many of you know how unique Oklahoma is to Indian Country. You know, a lot of what we're doing today is figuring out really who we deal with as far as Indian Affairs or NIGC because sometimes I feel like it's an NIGC type of an issue and it's not really Indian Affairs. So how closely does the NIGC and staff work with the Indian Affairs? And if there is an up-close relationship with them, should a person from Indian Affairs be included on the consultation? Thank you.

CHAIRWOMAN STEVENS: We do work pretty closely with Interior as many of you know. The authorities are divided between the secretary and the chair, and, you know, in terms of what we're doing in this process with regard to regulations, it may just be an agency that will be here. I'm trying to think of instances where Indian Affairs might be involved. They cover the compact approvals. You know, we do partner

with them. I know that has not always been the 1 case in the past with regard to Indian land determinations, but in support of President 3 Obama's good government, you know, we should as 4 a federal government be working with other agencies collaboratively and not butting heads 6 7 with them, and so we should be working together and really so that we're not creating 8 inconsistent guidelines or creating inconsistent 10 policies from one Indian agency to another 11 Indian agency, but certainly would consider if 12 there's a place for them in what we do, although 13 oftentimes they don't in most circumstances. 14 They share information. When they approve a 15 compact, they let us know, and as I said on 16 Indian land determinations, we do have an 17 understanding with them so that we can create a consistent determination rather than competing 18 19 or getting a contradictory determination from 20 one agency to the other.

2.2

23

2.4

2.5

JAMIE HUMMINGBIRD: I'm Jamie Hummingbird. I'm with the Cherokee Nation Gaming Commission, and I want to say first of all to thank the governor for hosting this meeting in such a fine establishment. Also I want to say thanks to the commission for having this consultation simply because I think this is a process that has been sort of needed for a long time to give the floor to the proper person which is our tribal commissioner, but also to undertake a real listening process and find exactly what it is the tribes need on a day-to-day basis, and as we go through this, you'll see these comments I'm sure across the country.

2.2

2.5

When we look at the questions that have been posed by NIGC, I think you'll find kind of a mixed bag in the sense that there are some things that need to be revisited. There are some things that if it's not broken, don't fix it, okay, but one of the things that kind of stands out maybe as an underlying issue for a lot of these questions is when we're looking at developing regulations or we're looking at developing standards, I think you should keep the actual goal or the actual meaning of what words we're using in mind in the sense that a standard is a standard, a goal to be attained. It is a place that we want to be. How do you get to that place is something that is going to

be fairly unique.

21

2.2

23

24

2.5

Oklahoma is very unique, not to say that any other tribe or any other part of the country is not, but one of the things that we have been saying for years, we being tribes, is that when we come to issues such as the Class II MICS or Class III MICS or the technical standards, when we look at those types of documents, it is something that I think the NIGC should consider taking a little bit of a step back from in the sense that the way the MICS are written out, we have a lot of what I call SOPs, standard operating procedures, just a lot of step by step processes and a lot of requirements. necessarily standards to be attained, but telling us how we get there, and one of the things that we have voiced for a number of years is the fact that the tribes themselves need to be the voice to decide, okay, how we get to that point because of our unique standards, because of our unique situation, whether it be geographical, economic or otherwise. So when you look at these, I think you need to -- when you see these comments, I'm sure you can take a step back and look at it from that 30,000 foot

view rather than the 10,000 foot view.

And as you go through this and as you decide what your agenda is going to be, I would also bring up an issue that came up as we were going through the developing of the technical standards, and that is the issue of cost to benefit. When we were looking at the issue of throwing out technical standards for tribes and the vendors to comply with, it was not until close to the very end of that process that everybody called attention to the fact that the proposed standards or rules that were being promulgated would have cost a lot more to the tribes versus the benefit that was going to be gained from that.

So as you go through and look at your agenda, I would also encourage you to step back and study is there a cost that's going to outweigh the benefits of this or is it vice versa. If the cost outweighs the benefit of enacting a regulation or a standard, then perhaps a bulletin may be the best way to handle it. Come up with best practices and some suggestions and let the tribes go out and determine what pieces they can use and should

STEVE ORTIZ: I just wanted to make a comment because in talking with tribal council before coming here, you know, since 1988 and prior to the past Bush Administration, the Prairie Band were a little confused. We felt IGRA was working, and it seemed like there were just little quirks in everything that differentiated problems between the tribes in Kansas and the tribes in Oklahoma. Having different versions of gaming was the only difference, so we really haven't seen -- we really don't understand why there's even a review of any due process, but it seems like everything has been working for us, but we understand there's some difference in the Class III down here, maybe some other parts of the country, but what I've seen, you know, like through -- I've gone to Topeka and talked with tribes in Wisconsin. I'm just kind of wondering. Everybody seems to be operating and wondering why are we even doing this, and until the Bush Administration pushing this thing, it just seems like the same thing is at the forefront, and we were constantly battling -- we

2.

19

20

21

2.2

23

24

were battling -- we didn't know what -- joining 1 2. with other tribes just simply the principle of trying to push it on us, joining with them. So 3 I often wonder, you know, sometimes maybe the 4 Tribal Advisory Committee just to maybe define a purpose of what it is we all even need to be looking at because, like I said, the gaming for us in Kansas is different than the gaming down here in Oklahoma. The issue of bulletins, I 10 have to agree, the bulletin, it's a much more 11 cost-effective way of doing things. So I just 12 wanted to throw that out there because I'm 1.3 really trying to understand now why we want to change anything if everything has been working 14 15 already, and I really don't see anything that's 16 I really don't see anybody's casinos 17 getting shut down for violations and not following their practices. The gaming 18 19 commissions throughout Indian Country seem to 20 have a lot of integrity and enforcing gaming 21 laws and doing their inspections and so forth. 2.2 So we're not sure if this is just a special interest thing for a few, but as far as the fees 23 24 and all this good stuff, we've been on both sides of the fence, but under IGRA, the way 2.5

5

6

8

things are set up right now, we've not seen any issues. So I just wanted to point that out as we started looking at this whole picture overall.

2.5

CHAIRWOMAN STEVENS: Thank you for your comment, Chairman, and actually that's exactly why we're talking because we know that the last administration, you know, there were certain things that were priorities to them. administrations come in and have different priorities, and as a result of that there seems to have been a lot of attention on certain issues at the NIGC like MICS. It's not the same across the board, which personally from my point of view, that's always been the issue. It's hard to, you know, aside from Class II, you have 28 states, 233 tribes, 400 something facilities with all these different compacts. You know, Class III MICS got a lot of attention, and that attention is still here. If you listened to my nomination hearing and you listened to the July hearing, that was still up here. They were bringing in the former chair to talk about it still.

So we do want to address it. We have to

Veritext/NJ Reporting Company 973-410-4040

address it, but we need to hear from everybody. 1 It's interesting because going -- this is our fourth city in a week. It's different. You're 3 right. There may be some places where, hey, 4 it's not broken. Don't try to fix something that's not broken for us, but it is broken for some tribes. In some areas they've never even heard of that, but we, for example, the Class III, you know, they may not have the best 10 relationship with their state, and, you know, 11 having the NIGC step in is their preference. 12 Not the case when we went to Washington. 13 Washington State said no thanks. We're good. 14 We're happy with our state. We have a good 15 relationship.

5

6

8

16

17

18

19

20

21

2.2

23

24

2.5

So we're here today so we can hear all these differences and try to figure this out together. It's really going to be a question of mechanisms on that particular issue, but also so that we don't burn a lot of time getting hung up with something that may not necessarily affect every tribe and have that suck all the air out of the room and all of our time out from under us.

So I appreciate your comments and your candor, and, you know, hope that other tribes

understand why we're here. Whether you have certain issues with our regulations or you don't, it's good to hear we're good, we don't have a problem, and try to be as inclusive as possible.

VICE-CHAIRWOMAN COCHRAN: Mr. Chairman, also there are a few opportunities that we've not capitalized upon fully that I think tribes would benefit from. One of them that comes to my mind right now is the self-regulation regs. They may not be harming you in any way. I'm hoping even if your tribe doesn't have the same distinct issues with something in existence, maybe you'll participate and work with us on capitalizing on some of those untapped areas that I think would benefit.

EDMORE GREEN: Good morning. I'm Edmore Greene of the Sac and Fox Nation in Kansas, and I am pleased to be here with some of my fellow representatives and our chairman and our gaming commissioner, and myself as a tribal council member and with our commission chair. Some of the comments, some of them maybe aren't broken, but they need to be reviewed or changed. A lot of our tribes, we rushed into this business

2.2

2.4

2.5

because we needed revenue for our tribe, but today we want to sustain the revenue, so we need to rework these things. We need to rework them, and in coming down here, we debated the issue that pertains to us, so we want to go ahead and make that presentation. I'm going to turn it over to our commission chair for the statement that we have prepared for the consultation meeting, Robert Nanomantube, the gaming commission chair.

2.

2.2

2.4

2.5

ROBERT NANOMANTUBE: Thank you. First of all, I'd just like to thank the NIGC for having this consultation and letting the tribes voice their concerns, but first of all, before I get started on the statements we have here, I would like to preface those comments with a citation for the Regulatory Act at 25 USC 2701 which states, "The Congress Finds That - (5) Indian tribes have the exclusive right to regulate gaming activity on Indian lands." I think is just very vital of Indian tribes and they should always maintain that exclusive right. So hopefully the Sac and Fox experience will assist this formulation of revised or amendments to the NIGC's regulation, and will

encourage an enhanced review of the regulations from day to day regulatory perspective.

2.2

2.5

We also have comments with regards to Part 502.16, definition of net revenues. The Sac and Fox is of the opinion that the definition of net revenues be revised and be consistent with GAAP and conform to calculations to GAAP. This would provide more uniformity in determining how net revenues are calculated. The Indian Gaming Regulatory Act at Section 2703(9) defines net revenues and any revision to net revenues must maintain conformity to the above language in TGRA.

Part 559, facility license notifications, renewals, and submissions. One issue that we've come across recently is that the tribes are required to have a facility license due to the environmental protection requirements, but we also as tribes also have to adhere to EPA regulations and Indian health and those types of things like that in our facilities. So not only do we have to conform to those standards, but also now we're submitting this to the NIGC, the facility licensing.

We had an issue recently with a wetlands

Veritext/NJ Reporting Company 800-227-8440 973-410-4040

which are in close proximity to the casino, which are subject to the jurisdiction of the tribe and to EPA requirements, and due to some flooding we had there, the EPA said that we were out of compliance with an EPA requirement concerning inappropriate discharge into a wetlands area. This finding, if proved to be accurate, would also result in the tribe being in non-compliance with the gaming facility licensing requirements. We found that EPA was in error in its findings, and we now have the burden of proving that it is in compliance with both the EPA regulations and the gaming facility licensing requirements. So I think the situation could occur more often than not with other federal agency regulations.

As for the MICS and technical standards,
Part 542, Class III minimum internal control
standards, this particular area is a primary
concern to the Sac and Fox. We recognize that
internal control standards are extremely
important to the Indian gaming industry and more
particularly to our tribe, due to its intent to
provide the protection of tribal assets as well
as providing for the integrity of the tribe's

gaming operations. In addition, Sac and Fox recognizes and supports the need for consistency in the auditing process of internal control standards in Indian Gaming.

1

15

16

17

18

19

20

21

2.2

23

24

2.5

Experience has shown that many tribes that offer Class III gaming have used the NIGC's bulletins as quidelines and have used said bulletins as primary guidelines for purposes of regulating Indian gaming. Sac and Fox believes that tribes that offer gaming are as technically knowledgeable and professional as commercial gaming operations, and are aware that if they did not implement their own tribal internal control standards that they would be opening up their gaming operations to illegal activity. Sac and Fox looks to industry standards in the gaming area and if it does not have the expertise or technical ability in key gaming areas, it retains someone or some entity to carry out what is needed to protect its gaming operation for the benefit of its tribal members. It is my tribe's belief that it performs the due diligence required in relation to following industry standards, whether or not a regulation requires it. Should Part 542 Class III MICS be

eliminated and replaced with guidelines, it is Sac and Fox's opinion that the tribes will continue to institute industry standard internal controls in the area of Class III. As to those tribes who have incorporated 542 Class III MICS in their ordinance or it is a part of their compact, there may be resulting challenges, but we believe that most tribes have appropriate internal controls in place and that the internal control guidelines would be used to supplant what is in previously adopted ordinances.

2.

2.2

2.5

Sac and Fox believes that the Class III MICS should be developed by a tribal advisory group process because of the ongoing changes in the gaming industry and the differences in tribal gaming operations, and the importance of considering tribal experiences in internal control guidelines developed. More importantly Sac and Fox would recommend that said internal control standards be issued as guidelines and that they would be provided to the tribes in a bulletin format and be updated on a regular basis. Technology is changing so quickly that governmental notice and the rulemaking process is too slow to keep up with said changes.

Possibly internal control standards could be referred to in recommended changes to gaming ordinances. For instance, revised ordinances may include a statement that identifies the requirement, that internal control standards be implemented by the tribal gaming regulatory agency that meet or exceed industry standards.

2.2

2.5

Therefore, Sac and Fox recommends that the Class III MICS issue should be considered one of the top four areas to have NIGC regulatory review, and that said review include the use of a tribal advisory group, with the resulting document issued as a bulletin. So I think that, you know, maybe the Class III MICS could also like the gentleman said previously be issued in a bulletin form as a guideline for tribes. You know, I'm sure that most tribes would adopt those if they haven't already to formulate their own standards, so I think that would be an easy way to go on that.

As for Part 522, submission of gaming ordinances for resolution, Sac and Fox believes that this section does not need revision, but that perhaps a bulletin could be issued that addresses recommended changes in an ordinance if

the tribe chooses to update their ordinance. For instance, the issue of internal control standards could be identified.

2.2

2.4

2.5

As for Part 514, fees, Sac and Fox is of the opinion that the past practice by the NIGC to issue a notice of violation if fees were paid late was kind of an extreme measure to impose upon tribes unless there's negligence by the tribes that can be shown as a pattern. It would seem more reasonable to develop some type of schedule of fines or penalties either based upon passage of time and/or number of times being late to pay. This is a priority issue to be reviewed, one of the top four for us, that could be revised by the regular notice and rulemaking process.

A situation in Kansas has become visible within the past three to four years which is causing concern to the Sac and Fox Nation. This is being brought to your attention because it could develop into more than exchange of memos between the NIGC, the state of Kansas and the tribe.

The NIGC regulations require tribes to submit investigative reports with each licensing

determination made by the tribes for primary 1 2. management officials and key employees, 25 C.F.R. Section 558.3(b). Sac and Fox is a part 3 of the NIGC's pilot program. Therefore, based 4 5 upon its MOU with the NIGC, it would ordinarily only submit a synopsis and the results of the 6 7 background investigation for a primary management official and key employee. 8 The Kansas compacts, however, place the 10 responsibility to conduct background 11 investigations for Class III employees on the 12 state and the Kansas State Oversight Act 13 prohibits tribes from disclosing most of the 14 information contained in an investigative 15 report, including to the NIGC. This is the 16 viewpoint of the Kansas officials.

17

18

19

20

21

2.2

23

2.4

2.5

As a result of the above, there is a conflict in laws and the Sac and Fox are caught in the middle of potential enforcement action by possibly the state as well as the NIGC. The NIGC general counsel has disagreed with the state's belief that the information cannot be shared. In an opinion letter dated June 18, 2008, from the former NIGC acting general counsel, Penny Coleman, to the deputy attorney

general, Mike Leitch, she stated "...that under the supremacy clause, where such a conflict exists, state law must give way to federal law." This issue has not yet been resolved. The Sac and Fox would like to thank the NIGC director of enforcement, John Peterson, for attempting to rectify the situation in an amicable manner, but it appears that Kansas is unwilling to change its opinion. There may be no resolution short of litigation, but the fact remains, the Sac and Fox Nation remains in the middle of a conflict of laws that could result in enforcement action against our Nation.

2.

2.2

2.4

2.5

So in conclusion the Sac and Fox would like to thank you for this opportunity to provide input into the regulatory review process. Thank you for listening, and if you have any questions, feel free to contact us.

CHAIRWOMAN STEVENS: Thank you,
Chairman. Do we have any other tribal leaders
right now that would like to make a comment or
if you have any questions or need clarification?
Governor Anoatubby.

BILL ANOATUBBY: I have two or three areas. I'd like to address others as they come

up. One in particular has been a difficult challenge for us. In Indian Country, it's pretty difficult sometimes to build a facility like this. You need folks that will be willing to take some risk to go along with you. remember one facility, Winstar, south of here, we first developed that. We had a deal with other authorities as well of the tribal legislature and they had rules. We don't want to waive sovereignty and don't go into debt, and 11 when we built a facility like this, it was sort 12 of difficult to follow that rule, so you look at the unique methods of financing, and I wouldn't say a partner, but somebody who's willing to 14 understand the risk and the gain. So sometimes you enter into financing and development of the 17 type agreements that are not the norm when it comes to financing.

1

2.

3

5

6

8

10

13

15

16

18

19

20

21

2.2

23

2.4

2.5

When you go to the bank, you sign a note, you get a mortgage, you know. Sovereign immunity. That doesn't work for us. I know some tribes do that and that's their prerogative. So we came up with a way that works a little bit like if you rent a Xerox Is Xerox still around? machine. I don't know.

I don't know, but I guess they've got some -that will tell you how old I am, but anyway we
rent the machine from someone, from a company.

They charge you by the number of copies that you
use if you don't own the equipment, and we chose
not to own gaming equipment because we felt like
we wanted to have the prerogative of having
equipment move in and out based on
profitability.

2.2

2.4

2.5

So after some months of finding someone who would see eye to eye with us, we found a gaming company to provide the equipment, provide the magnets, oversee and make sure that it was operating like it should, and then we decided we wanted to gain. If it wasn't making what we felt like it should be, move it out, and bring in another one. Now, these days you just change the face, but back then, we're talking several years ago, now some seven or so years, it was difficult to find someone that would be willing to do -- put the equipment in and assist with the financing of the facility.

We found a company that signed an agreement with us without recourse. Now, that's another thing that you can't find at a bank. No

recourse. In other words, if the business fails, they can't come and collect anything from you. You're not assigning any tribal assets to them. Anyway, this is sort of a unique financing agreement. It's a developing agreement. So in order for us to receive the financing and build the facility, they needed to receive in return funds that will help recover what they had in the facility. So it's a financing development agreement. So we chose to use the Xerox approach, a percentage based on the amount of revenue coming through.

2.

2.2

2.5

It is not a management agreement. We manage the facility. We hire all the people. We handle the money. I mean, it's ours much like Riverwind is ours, and there are those who are saying based on the fact that there's a percentage, that it was a management agreement. It's not, it has not been, and it won't be.

I think we need to clarify this in such a way as to make sure that financing agreements, developing agreements, those kind of things that help a tribe move forward with their gaming, that they not be characterized as management unless there's management involved. Management

will hire the people, handle the money, you know, make the decisions. You know, that's what we do. So we've had some difficulty over the years and we've resolved these difficulties, and we're at a point I think that most people understand our agreements, and we need to protect those of other tribes who may do the same thing. We need to make it clear that there has to be -- not every percentage contract is a management agreement. It's just not true. think we need to make sure that the definition of management agreement does not include every percentage contract.

I'm going to shift gears now, and it goes to self-regulation, and some tribes are ready for self-regulation, and there should be an attempt to promote self-regulation at every possible juncture. I think that in the past, years past, that perhaps there was an attitude that tribes can't regulate themselves and maybe shouldn't regulate themselves, but the statute provides for it, and I think that attitude needs to soften a little bit, if not go away. The tribes that have the ability to regulate should be allowed to do so.

ahead and get started again. We do have -- Lael has a microphone. Tom has a microphone right here. We also have a microphone set up over right next to Governor Anoatubby. Does anyone have any prepared statements they wanted to make, any questions or clarifications that we might be able to answer or provide? Right here and then over here.

BARBARA COLLIER: Okay. Hello,
everybody. Good morning. It's good to see all
your smiling faces. I've been honored and asked
to join Chairman John Berrey, the chairman of
the Quapaw Tribe Business Committee, on the
comments. I do appreciate several of the

comments, all of them that you all have made 1 2. today, and especially going down the same path 3 with Jamie Hummingbird. He and I worked together on several committees, and we kind of 4 5 feel the -- have the same opinions on some cases, especially concerning the front lines of 6 7 operators, the front line regulators, claims agents, the licensing agents that have to make 8 sure that these regulations are put in place 10 properly, and oftentimes I think that I would 11 like to recommend that the commission look at 12 the comments or possibly seek comments 13 specifically from gaming commissioners, especially compliance and licensing agents that 14 have to do these daily tasks because it's 15 16 something that even I as director, I'm not on 17 the floor. I don't know how, you know, things work with machines, and I don't have to deal 18 19 with that daily. I don't have to daily deal 20 with the requirements that the licensing 21 regulations puts forward and all the vendor and 2.2 management agreements and things like that that we deal with. So I think that we need to either 23 24 internally as commissions or agencies direct our 2.5 comments and perhaps include -- have inclusive

comments of our front line regulators as well as making comments ourselves as tribal leaders or business commissions or things like that, commissioners, so we can get the front line an absolute working relationship as they need to be.

2.

2.2

2.4

2.5

Also the financial burden that some of these bring, especially working with the Oklahoma Tribal Gaming Regulators Association, we found that oftentimes with smaller tribes, they don't have funding that they could utilize to hire legal counsel or to help them with consultations with contractors or things like that that can bring them more knowledge about changing the regulations or changes that are going to come forward. Now, I'm realizing we do have those training sessions and things, but oftentimes we found in the state of Oklahoma anyway, that even the smaller tribes even did not have the ability to send someone to those trainings and to have it available to them.

So I don't know, you know, if that would even be a viable fix to have people go to them to assist them with technical problems and things like that, but I do think there's a need

for that. So other than, you know, a lot of comments made by others this morning, we do think that those are some avenues that we can take.

VICE-CHAIRWOMAN COCHRAN: Thank you for bringing out training and technical assistance and its relationship to the regulations because in conversations among the commissioners, the intent of our four priorities does overlap specifically in that area in the sense that our training and technical activities should mirror deficiencies that we're finding in compliance with the regulations or deficiencies in audits so that we go back to the tribe rather than using the sledge hammer of an NOV to go back and say your tribe is consistently having deficiencies in X. We'd like to offer some assistance and see if we can't get that eliminated. The two actually have a unique overlap, and that's why these regulations and my revisiting some of these regulations will be so important. So thank you for bringing that out. CHAIRWOMAN STEVENS: Yes, sir. Right over here.

TOM GAMBLE: Yeah. I've actually got

two questions. I'm Tom Gamble with the Miami
Tribe, and one is that February 12th deadline,
is that a doable date for comments? And the
second question was that, you know, you guys are
in on every one of the consultations throughout
the country. Is there one main topic that ties
all of this together --

2.2

2.5

CHAIRWOMAN STEVENS: I'm sorry. Could you repeat that again? I'm looking at our transcriptionist and he didn't understand your questions.

TOM GAMBLE: Okay. Stand up. Okay.

One is the February 12th deadline for comment.

Is that a doable date? And the other one is the other question is throughout your consultations, is there anything that ties each meeting, one particular subject or number of subjects that may come up all the time? Thank you.

CHAIRWOMAN STEVENS: Thank you for your questions. The February 12th deadline, it appears doable to us because we're just asking about what your priorities are in terms of regulations that need to be addressed. We're not asking for a 36-page briefing paper from your legal counsel. We have it on the website

Page 59

right now, and actually it's not a bad example. It's actually a pretty good example that addresses the NOI, the notice of inquiry. It's San Manuel, and they go through reg by reg, and they're brief about it, and they assign for them a priority and how they'd like to see that particular regulation addressed. Some are technical advisory committee. Some just go forward with promulgation of regs. So that's what I mean. I think it's doable if it doesn't become too over -- you know, we don't need for it to be in depth and comprehensive, just what your priorities are.

2.

2.2

2.5

In terms of a common theme, MICS. Not even Class II. I mean, we've had some tribes say leave the Class II MICS alone as it is now.

We've had tribes say, no, please change them, but moreover, we've heard more about MICS, Class III MICS, than anything, and tribes are on different sides of the table on this, and we do have to keep in mind the Colorado River Indian Tribe decision set, which we cannot promulgate nor enforce, and so what I've been saying to tribes in these meetings is that we are looking to you to help us come up with some innovative

mechanisms to address that specific issue.

1

19

20

21

2.2

23

24

2.5

I think next on that, I would say management contracts and facility licensing, and facility licensing, tribes don't seem to be divided about that. Very similar to the remarks that we heard from the commission chair over here from Sac and Fox. Yes, sir. Right over here. Can you state your name and where you're from?

STEVE YORK: I'm Steve York. I'm the tribal gaming commissioner for the Fort Sill Apache Tribe and also the executive director for the Apache Tribal Gaming Commission. I've been hearing a lot of these comments this morning, and basically as a regulator, as a true regulator, the primary regulator in gaming for tribes, you know, our base document is the same base document that you have, and that base document is IGRA itself. The only trouble is when I read your inquiries that you put up here and stuff, even Ms. Echo-Hawk when she started out her statement, she starts out regulations. That's not what IGRA says. IGRA says you guys will develop regulations in management contracts, self-regulation regulations, but IGRA actually says you guys will develop standards

Veritext/NJ Reporting Company

and then it says standards or regulations. It doesn't say regulations or standards. The law says standards or regulations.

2.2

2.5

So the way I look at it, when we develop the MICS, whether it be for Class II or III, is that a regulation or is that a standard? I can tell you to me when Joe Smith first come out with the 2004 MICS, he created this little deal called variances. You haven't asked for a variance. Why would you ask for a variance? You already have a minimum. So the only way we get anything of a variance, you have to exceed that minimum. So I don't know of any tribe out there that submits variances to you.

Well, I knew when Joe Smith did. He just approved them if anybody sent one in. So by the time the first MICS hit paper, it was already changed. So every tribe out there had to comply with whatever variance he granted. So all I'm saying to you guys, the chairman, vice-chair, is read IGRA. Come to fully understand what the language is. Us as tribes have to comply with IGRA. You have to comply with IGRA. I don't have any problem with it. I mean, it's in plain language. It's a beautifully written document

even though a lot of tribes don't agree with it, but we bought into it and gaming started, but, like I say, you guys need to read IGRA. IGRA is very clear about the language in there. I mean, I'll just point out a few little issues that the NIGC hasn't followed. Go to the section where it applies GPRA. Does it really apply to you? It didn't apply to you until you reached 25 million. You're at that level now. You're at 26 million. That's what your funding is, so GPRA applies to you. Previous to that, GPRA applied to you underneath the Department of Interior budget process. So you need to look at GPRA.

2.

2.2

2.5

The next phase underneath GPRA, GPRA is only there for when it was enacted. In other words, when the law was enacted. It doesn't say as amended. So whatever that phase of GPRA was, that's what applies to you. Next phase underneath it, it also says in there that on a two-year basis that the U.S. Commission will address all the tribes asking for technical assistance, two-year plan. Every two years you guys will submit a plan to us on technical assistance.

I've been working in games for a long time. I've never seen a plan. Never seen a plan submitted out for technical assistance, but I do congratulate you because you're sending the survey out now asking, well, what kind of technical assistance do you need, but the technical assistance you're sending out to me is not what I've got in my training plan. It's not what I need. I'm going to ask for a lot of different things on that training plan besides what the NIGC currently offers because there are other trainings out there that all of the tribes need, but like I say, I just suggest to you that each one of you need to sit down and read IGRA and become totally ingested to it because I have to do that daily as a regulator for our tribe.

1

2.

3

4

5

6

8

10

11

12

13

14

15

16

17

18

19

20

21

2.2

23

24

2.5

I mean, I read IGRA. Next thing I have to read is the tribal gaming ordinance. Is it out today? I don't think so. You guys developed the regs, and regs say I've got to follow this, this and this to get Class II ordinance. If I want to amend it, I've still got to follow this, this and this to get there. So all I'm saying is if we're really going to have a true discussion about trying to change the regs, we

need to have a true discussion about what IGRA says because, like I say, Congress has already defined what a proprietary interest is. variables of the deal. They're saying it's 70/30 in management contracts or 60/40, and then the individual operations prior to 1986 bingo operations was a 60/40 deal, and I congratulate the chairman who was here earlier. His tribe had meetings out there that were doing a 50/50 split. That's a violation of IGRA. It sat there for a long time until the tribes took it up. The tribal court ruled. You can't have a 50/50 split. It violates IGRA, which I commend the court for that. Sounds like the judge knows how to read IGRA.

1

2.

3

4

5

6

7

13

14

15

16

17

18

19

20

21

2.2

23

24

2.5

So like I say, if we're going to have a true discussion about this, let's sit down and talk about IGRA, the base document. Establish the chair and the vice-chair and the third member. There's a few little skips in it. I mean, one of the skips that I thought was kind of out of the ordinary was on self-regulation. Well, I have to pay 25 percent of 1 percent. In your regs at the end, it says I don't have to pay a damn thing. That's a violation of IGRA in

itself because the law is wrote that way. It says you will collect 25 percent of 1 percent. It doesn't say that you can forget it.

1

2.

3

4

5

6

7

13

14

15

16

17

18

19

20

21

2.2

23

24

2.5

And then let's go ahead and talk about the quarterly fees. Law states quarterly fees. we're coming up, you can pay this fee every six That's not what the law says. The law says I pay quarterly fees. You collect quarterly fees. I know it makes it easier on your accounting person there and stuff, but I don't understand that, but the other thing is, well, the Buy Indian Act. The real question is does that give me Indian preference for my employment with the National Indian Gaming Commission? That's kind of a dead issue, but last year it was a hot item. Everybody wanted to see the National Indian Gaming Commission, and I commend them for you three Indian tribal members that are representative. I guarantee you it's still important to me. I think that's important to a lot of young Indian people that are looking for careers with the National Indian Gaming Commission to have some kind of Indian preference.

I mean, I can talk on and on about this, and

I don't want to say a whole lot of words when I get up and talk, but when I talk, I want you to listen because I think a full understanding of IGRA needs to be understood by everybody because I have to live it every day. I mean, when I'm working in a gaming operation, I have to go back and look at IGRA to see what Congress really intended me to do.

Like I say, it's a beautifully written document. It's very clear. Like I say, when you read it, if you read it like I do, it says standards or regulations. It only said you guys have to develop regulations for management contracts, basically self-regulation, and follow it all the way down in the regs, except at the end, you say if you qualify for this, you don't have to pay me a fee.

And I don't have any problems with the Colorado River Indian Tribes case. I didn't think at the time that you had authority over Class III gaming, and I still think that. applies to Governor Anoatubby, Chairman Houser, Steve Ortiz, all of the tribal leaders here all understood the Colorado River Indian case applies to them. Is Class III MICS a good deal?

1

2.

23

24

2.5

Page 67

I think anybody needs minimum internal controls. Is that the internal controls that the NIGC dictates? I don't think so. As far as I know, everybody you hire can read. So that means if I'm in the state of Arizona or if I'm in the state of California or if I'm in the state of Washington or Connecticut or anywhere else, I should be able to read whatever those minimum internal control standards are.

16

17

18

19

20

21

2.2

23

24

2.5

That's all I'm saying is just we need to have a good discussion about what IGRA says, what IGRA intended, because Congress was very clear about their findings, and I'll go back to your net revenue. Congress already defined it. Is there a way out of that? I can quarantee you there is. All you've got to do is change it and I'll sue you, and then we'll have a court decide whether IGRA needs to be changed, and that doesn't have -- I don't think anybody in here, whether it be a tribal leader or regulator or anybody, believes that we need to amend IGRA. Ι think we need to have a true understanding, and that includes people that represents you and us as tribes that represent the tribes. I mean, we need to have good dialogue. We need to review

what IGRA says, and that's all I've got to say.
Thank you.

2.2

2.5

Just to address some of the concerns that were brought up, we are in the process of implementing the Indian preference policy. It will be implemented. The Buy Indian Act, something as simple as holding a consultation in a tribal facility should be standard. It should be standard practice for us. We should be trying to go out into Indian facilities for our meetings. That was not something that was practiced regularly in the previous commission.

Speaking of the previous commission, you know, the last chairman served a three-year term, and many of the things that you're seeing up there are established regulations that were put in place prior to our arrival. I've been in office for seven months. Stephani has been here for a little over a year. Dan has been here for about nine months. This is a new commission.

We hope that your comments will incorporate your interpretation and your understanding and encouragement of using IGRA as a basis. We all come from Indian Country. I worked in my tribal

Veritext/NJ Reporting Company 800-227-8440 973-410-4040

Page 69

I thank the

gaming operation. I worked with my tribal 1 leadership on government gaming policy for my tribe. Stephani has worked for the Pojoaque. 3 She's also worked for the state of New Mexico. 5 Dan also has worked for the Mashantucket Pequot. Lael has worked for the Tulalip tribes, and 6 7 something that Dan has coined is that we're all products of Indian gaming. We have an 8 understanding of gaming because we came from sitting in those seats, but I do want to 10 11 emphasize that we want to hear everyone's 12 We've heard similar comments with comments. 13 regard to the base underlying foundation of 14 IGRA, and using tribes, for example, as primary 15 regulators, and seeing tribes as primary 16 regulator according to the way the act is 17 written. We certainly welcome comments that 18 provide us your views as they pertain to your 19 comments. So I just wanted to address some of 20 those things that were mentioned. Do we have 21 others that would like to speak, tribal leaders? 2.2 Right over here. 23 Hi. I'm Jeff Houser with JEFF HOUSER: 2.4 the Fort Sill Apache Tribe. I want to thank

Governor Anoatubby for hosting us.

2.5

commission for coming down. I've gone through 1 the NOI and have a few comments, and I want to say that I agree with the Chairwoman that some 3 of the concerns that we have are with the 4 5 actions that were taken with the previous chairperson. I'll get to those. They're not a 6 7 priority here. This is a priority list. I think the first is the management contract. 8 You know, our casino has a number of Class II 10 machines, and while it is said that we control 11 the hold of these Class II machines, we don't. 12 Maybe other casinos do. We can ask the Class II 13 vendor to change the hold and they've been getting around to it for a number of years. I 14 15 think that if, in fact, a Class II vendor has 16 control of hold as a management decision, then 17 it should be a management contract rather than 18 having a -- I think it should be explicit that 19 they have no control over the hold, that the 20 contract shows that the tribe has control over 21 the hold or we consider it a management contract, because sometimes it might be stated 2.2 that tribes have control over the hold, but they 23 24 never get around to it, I think, at least in our 2.5 tribe.

The second is the fees, late payment versus NOV. Our tribe received an NOV because of a clerical error and a miscommunication, and I strongly believe that the late payment would have been a lot better. There was no intention on our behalf to be late. A contract payment was not made on time. The second is a question on whether the proceedings before the commission should be formalized. Basically my approach to most of these questions are that these need to be formalized so that everybody can be sure that there's fairness. I think gaming is a highly political industry. It's influenced a number of elected officials. It's involved in various ways. It would just be good in my opinion if we could have any proceedings be formal, more like a court.

1

2.

3

4

5

6

8

10

11

12

13

14

15

16

17

18

19

20

21

2.2

23

24

2.5

And, finally, the Class III MICS, you know, I read San Manuel's response. I think that if it was struck down by the courts, it should be turned into a bulletin.

And then the facility license, I happened to be in a similar consultation like this in January of 2008, and the previous chairman of the commission said something about finding a

facility licensing law in his desk drawer, and that facility licensing would be implemented immediately. There was no consultation. I think that that facility licensing regulation was issued. The regulation should be withdrawn until there can be a full consultation about that.

2.

2.2

2.5

And finally the question about whether or not the chairwoman or chairman should withdraw an NOV, in looking through the regulations, I don't see a prohibition on that, so I'm curious how that interpretation came about, and there needs to be clarification simply that the chairperson has the discretion to issue an NOV. The chairperson should also have the discretion to withdraw an NOV. Thank you.

CHAIRWOMAN STEVENS: Thank you very much.

TOM GAMBLE: Tom Gamble with the Miami
Tribe again. In participating in TBAC, and now
we've actually changed the TBAC consultation, we
are active members in the budget process, would
an advisory committee to that nature be of a
benefit, because some of the issues that we've
heard today from a lot of people are tremendous

issues, and would it be an issue that 12 regents come together with the commission to discuss at length in, say, quarterly meetings or something like that? Would it be of help, and then also how would that affect the budget? Would that be something that you would have to add and how would that particular type of a advisory council be funded?

CHAIRWOMAN STEVENS: It's expensive. Ι can tell you TBAC is very expensive because we're paying for all the staff to go, all the representatives and all the alternates and all -- well, not all their staff. So it can be very expensive, and it's time intensive. It's a lot of time, and anyone who sits on TBAC here knows it's time intensive. There's three or four meetings a year, and then work that's done in between, but, you know, we will defer to tribes on how they might want to put together advisory committees, and I think part of Lael's presentation said, you know, are there areas where we would use an advisory committee, and depending on what the subject is, we might have variations of it because we will need industry experts unless somebody wants to get back into

1

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

19

20

21

2.2

23

2.4

the math behind bingo. If anybody remembers those meetings when we were going through a lot of math, you know, we'll have to think about how we can change as the situation requires.

Chairman Berrey.

JOHN BERREY: Yeah. Thank you very much. John Berrey, chairman of the Quapaw Tribe. I'm just wondering if you could give us just sort of your thought on the overall process at this consultation, what we'll be reviewing, sort of what you've heard, and then there's sort of -- I just want to know what your goals and your time frames that you're thinking about so we could start maybe with that.

LAEL ECHO-HAWK: Well, I can give a very brief summary. As the chairwoman said, sort of the primary topic of the consultations have been for the past several years is Class II and Class III MICS and the technical standards and what to do with those. There's been sort of a swirl of controversy around those issues for the past several years, and one of the things that the commission is really trying to do is to resolve that and resolve it in a good way for Indian Country, and so that has really been a topic of

800-227-8440

2.

1.3

2.2

conversation. There are sort of two schools of thought. Southern California was very interesting because it was very clear, the divide between tribes that want Class 3 MICS and they think the agency has an obligation to carry that forward particularly because the Class III MICS have been adopted either in a compact or in their ordinance, and a number of tribes, not many, but a number of tribes had given the NIGC enforcement authority over Class III MICS in their facilities.

2.2

2.4

2.5

On the other side you have tribes who absolutely believe that NIGC should repeal the Class III MICS section in the regulations, and perhaps issue bulletins or some sort of other guidance that has those standards and therefore those tribes that are underneath it, but the fees that are paid by tribes that do not believe that the NIGC has Class III regs, those should be used to supplement the Class III audits or to draft the Class III regulations or that small number of tribes that have included either by compact or ordinance.

So there is this divide, and I think as you see comments coming forward and the transcripts

on the website, you'll be able to see sort of the conversations that those two factions are having, and, you know, to be quite frank, the commission is going to have to make a decision, and so the more input we have on this, the better off we're going to be.

1

3

4

5

6

7

8

10

11

12

13

14

15

16

17

18

19

20

21

2.2

23

24

2.5

Aside from Class III MICS, there of course has been facility licensing over and over as similar to what we've heard earlier today. Facility licensing is the primary complaint in that this regulation was done without proper consultation. It contains a lot of duplicative processes. That's one thing that the administration is very adamant about, that we eliminate those duplicative processes. That's one thing that we're taking a look at, how we go about doing that, facility licensing regulations. Again, we need your input. That is something that's been very important to the tribes at the meetings that we've been to so far.

What else? The communication process. It's been very interesting. You've sort of heard, again, two different things. Gaming commissions want us to speak directly to the gaming

commissions. Tribal leadership wants us to speak directly to tribal leadership, and we want to communicate the right way and make sure that everybody gets the information that they need, but clearly there's a communication breakdown somewhere and we need to figure out how we can resolve it the best way.

1

2.

3

4

5

6

8

9

10

11

12

13

14

15

16

17

18

19

20

21

2.2

23

24

2.5

Class II gaming industry, again, you know, sole proprietary interests, and primary beneficiary has also been a topic that's been addressed. Pretty much everyone does like this penalty based or fee based kind of on a sliding scale in lieu of notice of violation which tribes pay their fees late. The pilot program, self-regulation, all those have sort of been the primary topics that we've heard over the past Tribal advisory committee, that's also week. been a discussion. What we heard last week or last Friday in the northwest was that whatever we do, we need to do it fast, and then the commission, you know, federal agencies tend to move slowly, and recognizing sort of limitations that we work under, we are trying to move this along as quickly as possible.

So I guess in answer to your question, after

we receive the comments at the beginning of February, we'll sit down -- I'll sit down with the commission, we'll go through, we'll make sort of a greater -- we'll look at what's come in, listen to priorities, and we'll begin to set the agenda.

2.

2.2

2.5

That agenda will come out in April as it's required to by statute, and it also works out nicely with NICA annual meeting, and at that point, we'll have the priorities set for the regulation, and we'll begin to move forward aggressively and as quickly as we can so that we can get as much accomplished as possible, but I would estimate that by the middle of the year we will actually begin -- we will actually be in the process of making some provisions to regulations, amendments and those type of things. We'll be doing the substantive work by, I hope, May, June, July. We'll be moving as quickly as we can. Did that answer your question?

JOHN BERREY: I was just thinking if you had some bulletins maybe (inaudible.)

CHAIRWOMAN STEVENS: He said, just to reiterate for the transcriptionist, that

Veritext/NJ Reporting Company 973-410-4040

bulletins might be good to use as we go through this process to let people know what's going on.

I'm Jill Peters, the JILL PETERS: executive director of the Comanche Nation Gaming Commission, and I'd like to say thank you to Governor Anoatubby for having us, and the commissioners for coming and seeing us here in Oklahoma. One of the challenges that I see is that each of our tribes have different levels of regulation as you know. Some of us have, you know, adequate funding where others are struggling to get the amount of funding that we need from the tribal councils, and I think part of that includes educating our tribal leaders on, you know, the capacity that gaming, you know, spans, and I want to thank all the tribal leaders for being here today and taking an active interest and role in the part that we play every day to protect your gaming dollar for the tribe.

I have some comments for the bulletin that I'd like to just briefly go down. On part 502, net revenue definition, just to echo what some of the other comments were, that it should be in accordance with the GAAP industry standards, and

that also the allowable uses of gaming revenue, the regulation for that may need to be looked at as well.

2.2

2.5

The Class III MICS should be struck, and this will allow the tribal gaming commissions to have more authority over our Class III gaming, and to put into place what works for each of us as individual tribes. The Class II MICS, just to echo, I think, you know, a tax should be developed, and that you should look at having equal representation from each of the regions as well as, you know, each one of -- Oklahoma has more Class II than, say, California, and sometimes I feel like we get left out by not having that equal representation, so take that into consideration as well.

Facility licensing, you know, I do agree that that does need to be looked at, but I just want to say for our individual tribe that it really did help us because we did not have the inspections that we needed until this regulation came out. It kind of forced us to get into compliance where we go into the facilities and get IHS out there to help us and to teach us to inspect, you know, food handlers' permits, and,

Page 81

you know, reached out inspections. It really did open us up to a part that, you know, we really just didn't have time for. There's so much that each gaming commission does every day, and you have your priorities, and, you know, facility licensing and EPA, HHS wasn't high on the list, but that kind of just forced us to put it on the forefront and get that under control. So it really did benefit us as a tribe.

2.

2.2

2.5

The NOV process, the chairperson should have the final say on being able to withdraw an NOV because, you know, in the communication process, once you issue it, you may find out that, you know, there are circumstances like Chairman Houser was saying, it may have been a clerical error. It wasn't, you know, ill intent on the tribe's part, but at least take into consideration those circumstances that led to that violation occurring and being able to retract that or, you know, reach a settlement agreement that's not so formal, you know, just relooking at that process altogether, and that basically covers everything I have to say. Thank you.

CHAIRWOMAN STEVENS: Thank you very

Veritext/NJ Reporting Company 800-227-8440 973-410-4040

much. Do we have any other comments before we break for lunch? Matthew?

MATTHEW MORGAN: Matthew Morgan, gaming commissioner of the Chickasaw Nation. I just wanted to give you an update. I know we've talked a little bit about the MICS process, our tribal working group. We did meet last week in San Diego, myself, Jamie Hummingbird, and Stephanie Brian. We did have a session last week in San Diego. So far we've been very productive. We probably had 40 to 50 people participate, but we've taken your charge very seriously. We're working very diligently to try to get you a product that Indian Country has input into to give you a place to start from on our Class II MICS, and then going farther than that looking into our Class III MICS and technical standards, making sure that those documents flow together not only for regulatory bodies, but for our operators, our manufacturers, and our tribal leaders to make sure that they understand everything, how it works together. I didn't know if you had a report yet back from San Diego, but we're working diligently and getting through that

process.

Also to speak to Ms. Peters on her comment on the facility licensing, one of the things I really hope that we look at in our facility licenses is, you know, like a lot of the subjects we talk about are our MICS. The cookie cutter approach to facility licensing sometimes hinders, and I give you this property as an example. You know, we have the Show Place Theatre, we have our gaming room, we have a hotel, valet, food services that are third The minute you come in and start parties. describing the parameters of our authority as boxes, that automatically limited my jurisdiction which I had before then, which our tribe saw fit to give me, which was to help alleviate some of our environmental health concerns and some of our problems in the parking areas, in our sewage and water plants, and so if you would keep that in mind as you go through and look at these, and maybe a support for going in and looking at bulletins on some of those things. So if you could keep that in mind, I'd really appreciate it. I think Mr. Green has a couple of other things that he would like to

Page 84

1 | say. Thank you.

2.2

2.4

2.5

CHAIRWOMAN STEVENS: Do I need lunch first, Jess? I'm warning you. Dan has duct tape.

JESS GREEN: I do appreciate the fact that this NIGC group has at least more willingly listened than the previous ones that I have engaged with. I have looked at what you have proposed primarily here in Oklahoma, and for the Chickasaw Nation in particular. My gaming commission has three lawyers. My gaming commission is capable of being determined to be self-regulated, but your current rules don't give us any advantage whatsoever.

I remember when IGRA passed. It was supposed to work into a situation where tribes did exactly that. There was even a special benefit we got by paying less fees because the NIGC didn't need to look at us. The current regulations haven't been utilized. The only tribe that's really had a benefit is the Mississippi Choctaws, and they got Congress to recognize them as being self-regulated.

Your current proposal asked about including percentage contracts in all of the management

Veritext/NJ Reporting Company 800-227-8440 973-410-4040

contract reviews. It's beyond your capability. 1 2. Our realty contracts are percentage contracts. A good deal of our advertising contracts are 3 percentage contracts. Even our cash services 4 5 contracts are percentage contracts. For the Chickasaw Nation alone, you would be overwhelmed 6 7 literally. Even Chairman Solpopi's group testified before Congress when they were talking 8 9 about giving a substantial increase in authority 10 over management contracts by an IGRA amendment, 11 they testified they would be overwhelmed.

Please understand your staff has grown five or six times than what it was five years ago, but the number of percentage contracts would simply be overwhelming. Moreover, you charge a real high fee to examine each of the people that are involved. If I had to have all the cash services officers pay \$10,000 a piece, who do you think they're going to make pay for that? They're not going to reach in their pocket and pay for it. They're going to bill that cost either directly or indirectly in the contract to us, and so for a contract that there's only 50, \$75,000 being spent, you're going to have us pay 75, \$80,000. This doesn't make sense. It

12

13

14

15

16

17

18

19

20

21

2.2

23

24

doesn't make sense economically for the definition of management contract to simply include all of the percentage contracts.

Your facility license regulations as Matthew pointed out really hinder us now. saying -- currently they based their infrastructure to limit the license that a gaming commissioner issues to the building. Now, I understand if you're in a PL 280 state like California where you don't have criminal jurisdiction, that's not a big issue, but here in Oklahoma we maintain criminal jurisdiction, and the gaming commissioner likes to reach all the way out to the edge of the parking lot perimeter for some of the tribes. Our gaming commission has always licensed the entire footprint that was in trust as far as they can reach as a part of the gaming facility so we can control health and safety because in our rural areas that's where we put the sewage ponds. Ιf you want us to have health and safety regulations that matter, his authority needs to reach beyond the edge of the building. You have limited the gaming commissioner's authority or your own authority because your authority

17

18

19

20

21

2.2

23

2.4

follows his. Do you grasp what I'm saying with that logic?

2.2

2.5

And this current reg says if I build a facility right next to the next one, in other words, if I've got a service station with 20 games in it, and I decide I need another 50 and I pull a trailer in or build a building, if I don't connect it with an awning, you won't assign a new gaming license. Now, if I've been licensing this whole square anyway, why do I need a new license? Why can't one license cover both so I can operate as both?

Again, I'm not saying that the people at the NIGC are just ultimately wrong. I'm saying their application didn't consider everything under the sun, and we really need to go back and look at some of these practical applications, and this Regulation 559 would be real easy to clear up.

Part 523, the gaming code amendments, 2710 of IGRA says that the chairman has a right to approve or disapprove the gaming code. We now have a regulation that says you won't consider an amendment unless it has these provisions in it. You're not invading the authority of the

gaming commissioner. You're not even invading the authority of the tribal chief or chief executive. You're invading the authority of the entire tribal government to meet that checklist, and if they can meet it without putting the two things that are in your reg in here, to do so. Indeed we have done that. That's why all these gaming ordinances have already been passed. IGRA doesn't give the NIGC the authority to add requirements, and the fact that it says it only applies to those amendments that are presented perspectively tells me the people who wrote that knew that. That needs to be addressed.

2.

2.2

2.5

There's been a lot of discussion about the Class II MICS. If you recall, the compacts are not approved by the NIGC, but by Interior. In November 2004, Oklahoma gave us a make it or take it compact by a vote of people, and it was approved and signed off by virtually every Oklahoma tribe you have in this room, and what it says is that we will follow the NIGC MICS. It didn't say the NIGC MICS as is amended as other legal references in that document preside. It says the MICS. Your change in the MICS needs to consider that for Oklahoma, technically we're

800-227-8440 973-410-4040

Veritext/NJ Reporting Company

locked in to 2004 because that's what the compact entered, and it was approved by the Interior, not by you.

So, I mean, a lot of these things are exceptionally complex. My suggestion is that you adopt standards because, again, I don't think it hurts anybody to have good suggestions, and that in the standards you point out, it's not meant to affect in any way any of the existing compacts. I just want to make sure you consider that we have a compact that tends to lock us into a specific time. The Class II MICS that were adopted two years ago have been in operations, and my bosses over here and this one, have noticed there are things that aren't Those of us that are technical people tend to write rules that when they're applied don't work very well, and I appreciate that Matthew is working on the game regulations, the game standards, but I want to emphasize that it's time for you to listen as you have pointed out and make changes to those 2008 MICS because they've been in existence just long enough for us to identify places that have warps, and we're not talking about a complete replacement.

talking about an improvement, and I appreciate that you've given us the opportunity to do that.

2.

2.2

2.5

One other thing about the MICS and gaming standards, there was no exemption for games that were litigated. Games have already gone to the Tenth Circuit or the D.C. Circuit, and they've been determined to be Class II. I don't think you have authority to tell that circuit court that they have to do something else to be Class II. I think when you do that, that creates a conflict between you and a federal court, and it's not just a district court. It's a circuit court, and it's been my experience they have about as much patience as Governor Anoatubby and speaking of patience, I think I've probably exceeded everyone's patience. Thank you for listening.

CHAIRWOMAN STEVENS: Thank you, Jess.

That was pretty painless. He was a gentleman,

Governor Anoatubby. Thank you. Because I

yelled at him the last time I saw him, but those

are all good words, and I appreciate your

comments and look forward to -- I assume there

will be some written comments submitted. If

not, we'll have these on record. If you want to

Page 91

expand, you're certainly welcome. We are at the lunch break right now, and what we'll do is we'll come back at 1:30 back in this room and we'll keep the mics open. Thank you and enjoy your lunch.

2.2

2.5

(Lunch break)

afternoon. I hope everybody had a nice break.
We'll be getting started, but I want to make
sure everybody is back in the room and seated.
So we'll open the floor back up to comment. We
have microphones in various parts of the room.
We know many of the tribal leaders have spoken
already. I think at this point if there are
others that represent their tribes or their
organizations and have comments, we certainly
welcome them. Yes, sir.

STEVE YORK: Steve York, Fort Sill

Apache Gaming Commissioner and executive

director of the Apache Gaming Commission. Like

I say, I talked pretty essentially about IGRA

this morning, and looking at the proprietary

interest. Like I say, Congress -- basically

proprietary interest basically set forth two

parameters, and that's set forth in the 70/30

percent on management contracts and the 60/40 on management contracts, and then they went down and looked at both gaming operations that were in place prior to 1986 and were Class II gaming operations run by individual tribal members. In that it basically said a 60/40 on that, but I think like I say when you guys were taking a proprietary interest, Congress has already established what proprietary interest is. So if you're looking at trust standards, you as the trustee, since you're the trustee, you have to look at that particular percentage, nothing else.

In other words, if a management contract comes in to you, you and the tribe or the management contractor of the tribe approaches the chairman of the National Indian Gaming Commission for approval. Your only standard you have to go by is 70/30. Now, does that mean in the modern day climate, the economic climate, can you go less than that? Yeah, you can. Can you go more than that? Yeah, you can, because it says 60/40 as long as the investment is there. So I still look at that even on proprietary interest. If I'm doing 80/20 type

800-227-8440

2.

2.2

2.4

things or the tribe is doing 80/20 with vendors contracting for them to come in and place their machines in place and I'm going to do an 80/20 split, I'm looking at that as a proprietary interest. It falls underneath the 30 percent, so is it okay? Yeah, it is, but you guys realize what you should be realizing that after a year of operation, then I'm going to be looking at their audit to see that them figures are true and correct, in other words, they haven't put any little outside loans or some other stuff in there to increase that percentage. You understand what I'm saying to So, like I say, I think Congress has already established a proprietary interest. I've said that. I don't know why we need to address it because you already have that authority basically in there.

1

2.

15

16

17

18

19

20

21

2.2

23

24

2.5

And there's some other issues that we've talked about this morning or that have come up that I've heard that are basically talking about, you know, several different issues that I basically addressed. Like I say, you guys are in charge. IGRA created you, you know. I'll give you a for instance. IGRA says that the

Veritext/NJ Reporting Company 973-410-4040

president of the United States appoints the chairperson or the chairman it says. It doesn't say chairperson or chairwoman. It says chairman, and then it says the secretary will appoint the other two members. Then in order for you to be selected to vice-chair, it then says you have to have a meeting of at least two of you members to elect the vice-chair. Did that occur this time around? Okay. So you basically did have a meeting? Well, like I say, in the communication end of it, no one knows when you have a meeting because Congress said you guys are mandated to meet once every four months. It doesn't say you're a full-time commission. It just says you're supposed to meet every four months, mandatory according to the law is what it says.

So all I'm trying to do is get other people in here to realize that all of us need to read our base document, read the law, follow the law. Like I say, I'm real concerned because of the standards that we need to develop. Develop the standards, not regulations, but standards. talked with you about the fact that here we create these MICS deals. Well, by the time we

put them in the federal register they're out of They're no longer usable, you know. mean, all of us you go through it every day running the day-to-day operations, the gaming operations. We're having to look at possibly revising PNP's in order to make sure we can meet some kind of minimum control or meet an internal control, and I'm not saying we need minimum internal controls. I'm just saying that in the guidance lines from you guys, we should be looking basically at a minimum concept of what minimally what we can get by with, not call it a minimum, but just call it an internal control. These are the internal controls we really need, you know. These are facts that you really need in order to run because I don't care where the gaming operation is, whether it be Washington state, California, New Mexico, Arizona, Connecticut, whatever, all of us totally realize that we need internal controls. We have to have some kind of internal controls to run our operations. Whether it be a Class II operation or a Class III operation, we have to have internal controls. I think there ain't no doubt about that, but do we need minimum internal

controls? I have no idea. That's up to you 1 2. guys and the tribes to decide what we really need, but if you really read IGRA, it doesn't 3 mention anything about minimum internal controls 4 5 either in Class II or III. Now, one real 6 important fact that I want to point out to you is the fact that you guys right now, you just passed your fee schedule, is that correct? You 8 just put your fee schedule out just not long 10 ago?

11

12

1.3

18

19

20

21

2.2

23

2.4

2.5

CHAIRWOMAN STEVENS: Not yet. Not yet.

STEVE YORK: Not yet? Okay. Well, if
you look at the fee schedule, Congress, when
they passed IGRA, said that your fee schedule
will not exceed .080, and if you're at .060 at
this time, that means you've only got 20 percent
to go, I mean, 20 points to go up. So when you
reach that level of .080, that's the maximum
fees that your organization can get underneath
IGRA. Do you agree with that?

CHAIRWOMAN STEVENS: I know that that's

CHAIRWOMAN STEVENS: I know that that's what the law says.

STEVE YORK: Do what?

CHAIRWOMAN STEVENS: I know that that's what the law says, yes. I understand that it's

Veritext/NJ Reporting Company 800-227-8440 973-410-4040

in the statute.

2.

2.5

STEVE YORK: Okay. Well, like I say, you're fast approaching it, so some planning is going to have to take place. I mean, you're going to have to look at that one real close.

ASSOCIATE COMMISSIONER LITTLE: The fee changes from time to time. In the past we look back to, you know, seven, eight years ago the fee was, I think, .80, and it has gone down because of its impact upon the revenue of the industry. So that will fluctuate.

STEVE YORK: Okay. Well, like I say, that's the maximum that you can go to underneath what IGRA says. So, you know, I mean, you need to look at all the factors, but, like I say, the true understanding, if I'm looking at all of the questions that you have, if you really look and examine what IGRA says, you know, even the Buy Indian Act, there's no federal agency out there that really has the Buy Indian Act. I mean, even the Bureau of Indian Affairs really doesn't have the Buy Indian Act. They basically coattail underneath that, underneath the AA contract that, I can do this business with small disadvantaged people. That means tribes. If

they're an AA contractor that want to buy any goods and services from them, you're more than welcome to do it. You know, that's the only thing about it is we're talking about the tribal advisory groups. There's nothing that prohibits you as a commission, I mean, besides consulting with us, talking to us about it, but you can adopt the Tribal Advisory Committee, the BIA, Indian Health Service or anybody else because the law allows you to talk to other federal agencies, other federal things to allow you to bring those in. I mean, there ain't a problem with that. I mean, it's in the law. It basically says you can do that.

2.

2.2

2.5

And then, like I say, you guys are always mixing apples and oranges up, too, because somebody in California does something different than we do here in Oklahoma. Like we told you with Jess Green, our compact basically applies to the 2004 MICS. Do we use the 2006 MICS? Yeah. I'd say most of us do, you know, but with the state of Oklahoma, if they come in and want to fight with us over the 2004 MICS, say this is what our compact says, you know. It's like the state of California. If the state of California

applies the MICS, then the tribes out there can use them, and you guys can use them, but that doesn't extend you beyond what you've already failed to do. You didn't go back and appeal the Colorado Indian River Tribe case. So I can tell you I don't think there's any esquires in the house who will disagree with me. When you didn't appeal -- or the National Indian Gaming Commission didn't appeal the Colorado Indian River Tribe case, that case applies to me here in Oklahoma just as well as it does in Colorado or Washington state or Connecticut or anywhere else because I can tell you that Washington versus Georgia applies to me here in Oklahoma just as well as it does to you in Washington state, you know. I mean, I'm just telling you what the sequence of the law says.

So, like I say, we all need to really have a real good conversation and just talk about IGRA. What does IGRA allow me to do, you know. commission is totally set up by IGRA, you know. Just like it says, the chairman shall appoint their legal counsel. That didn't take place this time. You appointed a legal counsel down here, but that's not the general counsel.

1

2.

3

```
CHAIRWOMAN STEVENS: Yes, I appointed
1
2.
    general counsel right when I got into office.
3
    Penny Coleman left and I appointed Larry Roberts
    as the new general counsel and I did that back
4
5
    in July.
             STEVE YORK: You physically -- you as
6
7
    chairman appointed him.
             CHAIRWOMAN STEVENS: Yes. Chairman
8
9
    appointed. Same thing with chief of staff.
10
             STEVE YORK: Okay. Did you have any
11
    help?
12
             CHAIRWOMAN STEVENS: What do you mean?
13
             STEVE YORK: I mean, that's just a point
    blank question. Did you have any help?
14
15
    other words, were there politicians helping you?
16
             CHAIRWOMAN STEVENS: Well, the chairman
17
    has some exemptions from Title 5. The
18
    appointments clause, which allows me to appoint
19
    -- the chairperson can appoint the general
20
    counsel, and that's what I did.
21
             STEVE YORK:
                          Okay.
             CHAIRWOMAN STEVENS: So I'm not sure
2.2
23
    what you're asking, what kind of help?
```

STEVE YORK: I was just making a

statement. I wasn't asking anything.

2.4

Page 101

CHAIRWOMAN STEVENS: I hope I was responsive. I did it on my own.

1

2.

16

18

20

21

STEVE YORK: You answered the question.

3 RICHARD GRELLNER: One thing to clarify. 4 5 My name is Richard Grellner with the Fort Sill I assume the issue is between a 6 7 management agreement determination and the fact that the tribe has had a proprietary interest or 8 a sole proprietary interest under the 10 ordinances. What I heard him say was that the 11 management agreement provision is what really 12 determines what's a sole proprietary interest 13 because it allows in certain situations 30 14 percent of that revenue or however that's 15 defined under the act to go to an outside

manager or if there's over 100 -- I think it's a

17 100 million dollar investment. That number goes

to 60/40. I guess the question would be is for

19 the commission is how do gross revenue contracts

for vendors fit into that and whether or not if

they're above 30 percent, there's not a 100

2.2 million dollar investment, or if there is a 100

million dollar investment above 40 percent, 23

2.4 whether or not that violates IGRA. I think what

2.5 I took out of that, maybe in the interest of you all, is that in the current requirement we have out here, we have a lot of 80/20 splits with vendors. Obviously vendors put in a lot of investment into the product, and they spend a lot of money to get themselves into position. The question will be whether or not an 80/20 gross deal, if you convert it to net, would be above 70/30 or in a situation where the investment is high enough would be above 60/40. I think those guidelines maybe where we do have some authority is to start looking at that and seeing what is and what isn't, you know.

2.

2.5

It's one thing for somebody to put a machine on the floor and say I want 20 percent of the revenue, but not have the time base. Another thing, one of my clients has an 83-month contract, 80/20 gross, which in my mind converts to 60/40 net. It's another thing for that to be tied up and have no real consideration for the 83-month revenue stream. You can say, well, the tribes can do this or do that, but at some point, you know, the tail is wagging the dog. I think I agree that the only authority for you guys to look at that is within the context of the management agreement and whether or not

Page 103

those percentage guidelines are somewhere in there. The next thing is whether or not it's time based, and that's the issue.

2.2

2.5

CHAIRWOMAN STEVENS: Thank you. Do we have more comments? There we go. Dan was just wondering where is Liz?

There was a microphone on the floor. Members of the commission, let me just say that this is such a refreshing change in the openness and transparency and opportunity to have a true dialogue. So I wanted to say we've already seen a huge improvement in the kind of relationship that I foresee for the NIGC and Indian tribes. So I want to thank you for that. I want to thank you for your horrendous travel schedule that you've undertaken, you know, for these two months. It's really quite remarkable, and you're to be commended to really reaching out into Indian Country on these issues.

I speak today not to bind anyone that I might represent, but just say that there are a couple of other issues. One is the enforcement policy at the NIGC. You know, for a long time

Veritext/NJ Reporting Company 973-410-4040

the NIGC had a voluntary compliance policy, and that changed during last administration, and the enforcement policy became, you know, really based on criminal enforcement law as opposed to a civil regulatory model, and I think that in your regulatory review, it would be -- you know, I would appreciate that getting some attention as well as starting to develop internally in the NIGC, you know, internal institutional structures such as enforcement policy manual and policy manuals for some of these day-to-day functions that staff is performing so we can all rely on that so we know what the processes are going to be both externally and internally. you know, I throw that out there.

I also want to reiterate a point that I think I've made to you all, you know, previously, which is that, you know, we have a real opportunity now to look beyond the corner that we all locked each other into for the last few years in our relationship with the NIGC to go beyond that and take a look at doing some things using the statutory language in a way that's going to ensure that the tribes have the fullest benefit of the law, you know,

There are a lot of these problems that I believe we can resolve together with the NIGC through the self-regulation process, and I think that that regulation was put in place some time ago, and it hasn't worked. It's probably never going to work. It's a disincentive as opposed to a carrot in terms of compliance, and I think it could solve a lot of our -- a lot of our differences and get some processes in place to So those are a couple of other items that we didn't talk about too much today, but I would really welcome the NIGC's review of those things, and one thing that I did mention previously when I was in San Diego which is the NIGC's view of the National Environmental Policy Act and its applicability to the NIGC's actions with regard to tribal governments. I think that, you know, there's some serious legal issues there, and I think that at least with respect to some of my clients, those are the things that we would really like to work with So thank you very much again, and I hope you enjoy Oklahoma. Thank you.

CHAIRWOMAN STEVENS: The general counsel

1 that I did appoint actually came from EPA, and has a very strong background in NEPA, so that's been very helpful to us as we examine as we did 3 and consulted on the tribes over the summer on 4 5 the NEPA manual that was published in December 2009 prior to any of us arriving. So we have --6 7 he's actually taking a look at that, and I do want to say that we have heard in the other 8 consultation sessions about self-regulation 10 being a carrot. It should be an incentive 11 rather than a disincentive because we only have 12 just a handful of tribes that are certified for 13 self-regulation, and we welcome some comments on 14 how we could address this.

VICE-CHAIRWOMAN COCHRAN: Liz, will you be submitting written comments on behalf of your Oklahoma or Kansas clients?

ELIZABETH HOMER: Yes, ma'am.

VICE-CHAIRWOMAN COCHRAN: Thank you.

KAY BUSBY: My name is Kay Busby. I'm the executive director of the Delaware Nation Gaming Commission, and I, too, would like to say thank you for this open forum. I have been involved with Jess Green and Nancy many times meeting with the previous chairperson, which was

Veritext/NJ Reporting Company 973-410-4040

not a very pleasant experience I might add. you see, I still -- I did survive and I still am employed. Thank you. My comment to you is when you're looking at these regulations, would you consider the smaller organizations such as my own, the Delawares, who have a limited funding source when you're passing these regulations, and take into account that we are on a fixed budget, and it's like if we go and ask the tribal leaders, well, we need more money because we have to comply with this regulation, we have no way sometimes like the facility licensing, for example, of knowing that was coming out. It came out. You will do it. That's the end of it.

My other comment is I, too, second what other individuals have said about the fee process, the NOV process. We, too, were fined and issued an NOV and issued a fine for a clerical accounting error that we made in our accounting process, but lessons learned from that, of course, and now we have a mark against us and we take that -- we take our regulating very seriously, and we're very proud of what we've achieved to be where we're at, but that,

1

2.

3

20

21

2.2

23

24

too, looks like a D on us for -- you know, if we could maybe come up with a forgiveness plan, putting that in simple terms, that would be wonderful. When I first started working for the Delawares, I, too, looked into self-regulating, and when I read the regulation for that, there was just no way possible. No way that I could go to my tribal leaders and say I need another complete budget for this amount of money that maybe would be sufficient to fund this 11 self-regulating body, which just never had a 12 second look. It's very overbearing in my 13 opinion.

1

2.

3

4

20

21

2.2

23

24

2.5

Also I am from Tahlequah originally. I'm Cherokee, and I'm very proud to be an Okie. With that being said, we are unique here, and I know that you hear that word, "we're unique here." Other organizations say, "Well, are you real Indians down there?" Yes. With that being said, our Class II games are unique. Our bread and butter is our Class II games, and our customers like our Class II games. So if we change it to the fact that it is not what our customers like, we're going to have a significant loss of revenue, and if you're a

Veritext/NJ Reporting Company 800-227-8440 973-410-4040

small organization like the Delaware is, we only have one facility. We're fierce at protecting our facility. We do whatever we can to protect to ensure that the money that we receive goes to the tribes, and it has just made our tribe a better organization, helps our elders, helps our children go to school. So there, too, please relook at those Class II, and I, too, agree with the Class III MICS. Because another state has a problem with their state in trying to reach an agreement with their Class III games doesn't mean that it should be everybody. I think it should be a case by case basis. Maybe you could -- like the more experienced regulators said, you could put it in as a suggestion, a bulletin, a standard, and that we as self-regulators can involve that if we need to. We are locked into our compacts. We have a very good relationship with the people, with the state in my opinion, and grandma always said don't mess with it if it's not broken.

CHAIRWOMAN STEVENS: Thank you.

VICE-CHAIRWOMAN COCHRAN: Thank you for those comments. I just want to say something because every time I keep hearing this story, it

just hits me in the gut like the first time I 1 heard it. For whatever justification the NOV's 3 were sent out for late payments for fees, the first time I heard that happened, I didn't know. 5 I had been on the commission for just a short time, and I happened to be in California, in the 6 foot hills of California with a very small tribe, and I was sitting with the leadership and 8 talking with them, and they were very proud of 10 the fact that they had negotiated a settlement 11 with my agency to reduce their fee from \$40,000 12 to \$20,000 on the NOV. This facility employs a 13 total of 40 people. Their fee payment was 14 \$1,400, and I hear the story, and ever since 15 then I'm hearing the story, and, Liz, thank you 16 for your comments because it shouldn't be in my 17 opinion that we use the heaviest handle we have on enforcement to collect fees. There's other 18 19 civil regulatory ways for us to accomplish that, 20 and that's my opinion on that particular issue, 21 but I just thank you for continuing -- even 2.2 though it hits me in the gut, thank you for continuing to let us know how many of you here 23 24 in my home state are affected, because although my tribe does very well, I know that the 2.5

Delawares, you do fiercely protect your facility as you should, and we should be mindful of how they impact even the tiniest facilities because they're very important to the tribes.

VICE-CHAIRWOMAN COCHRAN: I do want to make a comment - thank you, Stephani - about one size doesn't fit all, and that's what I heard you saying, and we've heard that here before. It's different from state to state. It's even different within the states, you know. state that I'm from. There's very small operations that are in very remote locations, and very large operations that are closer who might be able to handle, you know, more requirements of them or, you know, not have it affect them, but that's one of the reasons why we're having this open forum. A lot of tribes are saying, hey, I didn't know that that was going to be the effect over there, you know, when I propose something for my tribe, it has a ripple effect on that tribe over there and vice versa. To be able to hear or be able to say wait a minute, if you do that, this is what's going to happen to us over here, and to want to hear it and be able to share it, but also to

help us come up with some solutions so we don't leave anybody behind. This is going to be the responsibility of all of us by giving us your priorities where the rubber meets the road as we start doing draftings and changes, whatever those changes might be. They might be standards, they might be regulations, they might be bulletins, they might be guidelines. Could be a number of things, but whatever track we're on, you know, I'm going to turn -- I'm going to keep asking all of you how do we come to some happy medium here so nobody is left behind, and then we continue to protect this industry, and we stay within the confines of our statutory authority. Any more comments? Yes, sir. Right over here.

23

24

2.5

JEFF HOUSER: Jeff Houser, Fort Sill Apache Tribe again. I want to make a clarification on the facility licensing. The Comanche regulator made me realize that it's not necessarily the ultimate holding of facility licenses, but the 120-day requirement that was announced, and when those were announced at the consultation in 2008, it coincidentally happened to effect some plans that we had drafted. So I

Page 113

think that while facility licensing in general is good, I'm not quite sure about the 120-day requirement given that there wasn't a consultation. I still think -- there's a reason to think it might not be effective.

2.2

2.5

The other part is -- one thing I left off was the consultation advisory committees have been in office nearly eight years, and I've only been aware of advisory committees for gaming after they had been set up, so it would be good to have a method that all tribes can consider fair and inclusive to allow everybody to have a voice. So thank you.

CHAIRWOMAN STEVENS: Thank you, sir. We have heard that from the other consultations about who gets to choose and what the requirements are and who gets to weigh in.

Actually, Lael, if there was anything that you wanted to bring up that might not have been brought up before?

STEVE YORK: One more thing.

CHAIRWOMAN STEVENS: Certainly.

STEVE YORK: You guys are looking at vendors. Can you as the NIGC help me conduct a background on a vendor? I'm going to be real

simple about it. If my gaming ordinance 1 2. requires me to license a vendor, then the only mechanism we have -- of course, I understood 3 back in the old days the NIGC basically were 5 underneath manual fingerprints. So in order to do that, you went and visited on the 9th floor 6 up there. You had boxes up and down the floor and up to the ceilings and all sorts of offices 8 filled full of vendor licenses. I mean, well, 10 background licensing or whatever it is, but can I as a tribe, if it's in my gaming ordinance 11 12 that was approved by the chairman of the 13 National Indian Gaming Commission, can I use the system that I'm paying for to begin with as a 14 tribal regulator? In other words, when I was 15 16 paying \$35 and now I'm paying \$24 for a vendor 17 license, can I run that person through you guys even though you don't have any regulations 18 19 dealing with vendor licensing? Can I still do 20 that? Can I run a vendor license if in my 21 gaming ordinance it says I will license these 2.2 vendors? 23 CHAIRWOMAN STEVENS: I think that was 2.4 one of the questions that was in the slides.

STEVE YORK:

Like I say, I think I can

do it because I'm giving you a check for that person to begin with, and it has no bearing on your system one way or the other. It's just a little bleep in the space in the electronic format, so it's not a big deal to me, but, I mean, if you found out and sent one of your field investigators and say I'm going to give you an NOV because you're trying to license vendors through this deal, you can't do it, well, it says in my gaming ordinance that you approved that I can, then what kind of catch 22 are we going to have?

2.

2.2

2.5

CHAIRWOMAN STEVENS: Well, I think
that's one of the questions we have in front of
us is there are some tribes who have vendor
licensing that's arranged with their state and
they work --

STEVE YORK: I'm going to take it one step further. You guys license people underneath, what, 502.14, correct? There's ten positions in there that you say they're required to have a license. So if I read that right, if I've got a gaming vendor in there and he's got a server in the house, and he can come in, his technicians can come in and open that gaming

machine and stuff even though he doesn't have access to build a separate box, you know, but he still has access to that system through his server or through that individual machine. So I'm saying underneath there he's covered underneath one of your definitions, underneath 502.14. So I'm arguing that with you, too. I'm saying that you don't have to have a regulation to say that you can either license vendors or not because it's already covered underneath your current standards or your current regulations. That's all I'm saying.

CHAIRWOMAN STEVENS: Okay. Thank you.

RON TWOHATCHET: My name is Ron

Twohatchet. On Page 685 on the first column

there, it says fingerprinting for non-primary

management officials. It lists two areas where

NIGC is responsible for taking fingerprint cards

from primary management officials and key

employees. Like you said, your question, your

question is addressed here. Should the

commission develop or implement rules and

regulations to fingerprint vendors, consultants

and other non-employees that have access to the

gaming operations of the tribe? So the question

Veritext/NJ Reporting Company

800-227-8440

2.2

2.4

Page 117

that addresses it here is that should the commission adopt regulations that would allow tribes, at their option, to submit fingerprint cards to the commission for vendors, consultants, and other non-employees that have access to gaming operations?

2.

2.2

2.5

So in his statement that these regulations already exist under some part of the regulation, is it true, because according to this you don't have those regulations for vendors and consultants in place with NIGC whereas a tribe may have those in place. So I guess what they're asking is that if the tribe has it in place, would NIGC also incorporate that into their regulations so that they could support what the tribes have?

CHAIRWOMAN STEVENS: Well, that's what we're looking at right now. We're looking at Lael with regard to what do we do now with management officials or key employees only. Some tribes don't want to have their vendors licensed, but some of them do. Some of them have other mechanisms that they can use. They can use their states, and the question is should we be expanding our scope to include that if

it's at the tribe's request and how do we handle that. That's the question. I think the question will turn and what we're looking for is do you want us to do that? Should it be an opt-in for tribes?

2.2

2.5

LAEL ECHO-HAWK: The other issue with that is that we have an agreement with the FBI. They're the ones that actually do the fingerprinting, do that stuff for us, and so it may require an adjustment to the MOU that we have with them, and if it's something that tribes want, then we can certainly look at that as an option, but currently it's my understanding that within the agency, we only review those two categories of fingerprinting for tribes, and if it's something that tribes want, then it's something that we need to hear about and then go forth with that mechanism to do that.

JAMIE HUMMINGBIRD: Jamie Hummingbird with the Cherokee Nation Gaming Commission.

Just to kind of tail onto this, one of things that popped in my head when I was reading that particular question was, and it goes to Mr. York's statement as well, if under that

definition of a key employee or a PMO, and it has any other person deemed to be a key employee by the tribe. So the tribe could theoretically say that a vendor employee is going to be considered as a key employee. However, I'm not sure if the NIGC or even if the tribes or the vendors would want to have the burden of supplying all of their information as a key employee and have that on record with the NIGC. That may be a consideration. Another thing is the backgrounds that we do on vendor employees is not as thorough as I would like it to be. would be very expensive to do it otherwise, but if we were to have -- if there was a regulation that puts clarity in there that allowed for us to do that, but did not require the person's file to be on file with the NIGC, that may be something that would be important to review for tribes and the vendor employees.

BARBARA COLLIER: Barbara Collier with the Quapaw Tribal Gaming Agency. Jamie just made me think about one of my worst nightmares, and that is the onset of us as regulators looking at off-site vendors, Internet gaming possibilities, those kinds of vendors, and to a

1

23

24

gaming commissioner, I think that's one of our 1 worst fears is to have someone be able to address our system as a whole that we haven't 3 done a thorough -- very thorough background on, 4 5 and it's getting more and more difficult to do that as we move forward with these issues 6 7 because sometimes these companies will -- not sometimes, most often. Even the large companies 8 will say, well, we don't have certain specific 10 technicians that address just your facility. 11 We have people in India or England or, you know, 12 California or Connecticut or wherever they're 13 from, they're located for this company in that 14 So they're not on site, but they have a 15 very specific -- they can specifically address 16 your system remotely without your knowledge of 17 whether they were an outstanding citizen. So I think, too, we need to consider what might be in 18 19 our future, which I think we all know that we're 20 looking at more and more technology out there to 21 put demands on the regulations of gaming 2.2 commissions and agencies. So it would help us, 23 I believe, to be able to have a better, you 24 know, perhaps some of us that can afford to, 2.5 utilize companies that are doing background

checks and things like that other than the ones 1 that we can send in to NIGC, but if indeed we do 3 have to start looking into these more thoroughly, it makes more sense for us and puts 4 5 my mind at better ease for an FBI background check than it would be for some state or local 6 7 organization to give me that comfort zone. if that's something that we would be able to 8 have, that would be great.

CHAIRWOMAN STEVENS: Any other comments?

JANICE ROWE-KURAK: I'm Janice
Rowe-Kurak. I'm chairman of the Iowa Tribe of
Oklahoma. First, I would like to say thank you
to Governor Anoatubby and the Chickasaw Nation
for hosting this. Also I'd like to say thank
you to the NIGC. Thank you for bringing this
here and hearing from us. We appreciate the
opportunity that the NIGC has given us for this
dialogue regarding these regulations. As a
tribal leader, I believe that we need to hear
from these different tribes and these different
leaders. It kind of lets us know that even
though they're on a day-to-day basis, we feel
like sometimes we're experiencing these issues
alone. As we hear, we're not alone, and you had

said something about reaching a happy medium. I believe these consultations is the way to reach that goal. Thank you for the opportunity.

2.2

2.5

CHAIRWOMAN STEVENS: Any other comments?

Don't rile up Jess again. The lights came on in the bar. Well, in the absence of any further comment or additional comments here, that's putting aside written comments that we hope we will receive from everyone here, we might do a last comment from the two commissioners. Any others? Last call for comments. Lael, was there anything in particular? I think we've touched on just about everything. Okay. Dan first.

ASSOCIATE COMMISSIONER LITTLE: Well, like I said earlier, before everybody leaves, I just want to thank you for coming today, and I know this is kind of a hard process for us to get used to, you know, and I will say it again. You know, the NIGC, we don't want to be talking to you or at you. We want to be talking with you, and that's how we come together and collaboratively make good decisions for this industry. We've heard a lot of good things here. I never took this job expecting it to be

an easy ride, and I do appreciate the poignant and difficult questions, and I look forward to more of them in the future, and this is just the beginning, and once again, thank you for your time today.

2.

2.2

2.4

2.5

VICE-CHAIRWOMAN COCHRAN: I just want to say again to the tribal leaders and to the chairmen thank you for your time. Thank you for giving us an opportunity to address you. I always appreciate very much how busy your schedules are. Thank you for carving out time for us. I recognize it's very special, so thank you. Thank you also to the other attendees and the other regulators that are here. I know you all put in a lot of work to protect the assets of the tribe. I know Mr. Morgan, Mr. Green, you're protecting my tribe's assets and you're therefore protecting my child's assets, and that means a lot to me, so thank you. Safe travels to going home. I wish you well.

CHAIRWOMAN STEVENS: I think we might actually have one other comment.

JOE BUNCH: My name is Joe Bunch, and
I'm chairman of the United Keetoowah Band Gaming
Commission. When we look at the rules and

regulations, just look at it across the board, big tribe, little tribe. We have a very important job, a very serious job. Sometimes our decision making aren't the most popular in the world. What I'm trying to say is let's make it fair across the board, big tribe, little tribe. When you add equipment, when you look at software systems, when you look at changing the MICS systems, to go into those software systems, it costs. It costs a tremendous amount of money, so what I'm trying to say is down the road, when we look at these things, believe you me, we'll be there. We can talk about that, and you can see where the cost goes.

The other thing is we have the opportunity to be proactive. We have the opportunity to visit with the commission. We have the opportunity. The last time the chairman was here in Oklahoma, he got a welcome reception, believe you me. When he tried to change the definition of Class II bingo from a 5 second game to a 20 second game, he just about cut out half of our profits so to speak. We're talking about that kind of money when we're looking at these rules and regulations.

800-227-8440

2.

2.2

So ladies and gentlemen, look at your policies, look at your rules and regulations, take note. See what it's affecting, how it's affecting you and your operation. Granted, these folks are willing to listen, and that's part of the administration. The administration said they would come back to the Indians and try to help out, so here's our chance. Thank you very much.

DAVID QUALLS: (Comments submitted for transcription) The Oklahoma Indian Gaming Association's membership includes 21 tribes engaged in Indian gaming in Oklahoma. Gaming is a major part of the lives of these tribes and the state of Oklahoma. Indian gaming employs over 14,000 people in Oklahoma and generates gross revenues of over 3.5 billion annually.

The OIGA congratulates the new commissioners for initiating the regulatory review. This effort creates an opportunity to rebuild trust between the NIGC and the tribes who fund the agency. The review allows the NIGC to break with the past and demonstrate a true commitment to the regulatory structure and limitations created by Congress and IGRA. Most importantly,

1

19

20

21

2.2

23

24

2.5

As the NIGC conducts its review, the OIGA suggests that the commission evaluate each regulation under consideration in light of specific first principles. Initially the regulatory structure of IGRA must be respected. The tribes are the only regulator of Class II Each regulation must respect rather than diminish that congressionally mandated role. As to Class III, by allowing tribes to define the regulatory framework in their compacts with the states, Congress effectively removed the NIGC from the vast bulk of the Class III regulation as the courts have confirmed. Accordingly any NIGC regulation should have clear authorization by reciting an identified section of IGRA.

Enforcement should reflect the primary role of the tribal gaming regulators. Accordingly, the OIGA encourages an NIGC enforcement process that begins with collaboration between the tribal gaming regulatory authority and the NIGC.

Such an approach, founded on dialogue rather than litigation, should be both efficient and inexpensive. Only if such dialogue proves unsuccessful should an NOV be issued. In such a case, the NOV process should follow clearly defined rules designed to promote transparency and fairness resulting in a documented, reasoned decision. We are encouraged by the NOI's mention of that process, along with consideration of discontinuance of NOV's for late fees. We strongly encourage the commission to go one step further, and begin refraining from the use of NOV's except in cases of substantial and ongoing violations of law, or where there is an immediate threat or danger to the tribal operation or assets.

Second, because one of the primary statutory purposes of IGRA is for Tribes to develop their economies, and thereby generate funds for vitally important governmental purposes, the NIGC should consider the cost burden on Tribes of each regulation examined. This consideration is of even greater importance in light of the uncertain economic times. As Tribal regulators know, regulatory objectives can be met through a

variety of alternatives. The least costly regulation that reasonably meets the regulatory goal should be the first choice. In other words, each regulation should consider the economic cost in relation to the regulatory necessity of the rule.

This cost of regulation is of particular interest to OIGA members in the context of self-regulation as allowed by IGRA. Oklahoma tribes spend millions of dollars in high quality effective regulation of their gaming activities each year. In particular, the Oklahoma tribal regulators have developed the highest degree of professionalism in the regulation of Class II gaming. The success of the tribal gaming regulators is confirmed by both the extremely low number of NOV's in Oklahoma and the marketplace confidence expressed by our growing player base. Many OIGA members would qualify for the certificate of self-regulation authorized by IGRA. However, the cost and complicated process of obtaining self-regulation status embodied in existing NIGC regulations impede tribes from receiving that sovereignty-based benefit. We urge the NIGC to

streamline its regulations so that the exemplary regulatory environment created by OIGA members will be recognized as Congress intended. We stand ready to work with the commission to finally fully implement this statutory provision.

23

24

2.5

Third, each regulation should be evaluated for its impact on attracting and protecting capital. Tribal gaming is capital dependent. Access to capital is presently limited for nearly all the tribes. However, for many of OIGA's member tribes, it has always been a challenge to attract capital. Thus OIGA member tribes long ago learned to be creative in how they attract capital to grow their business. Particularly when considering management contract, collateral agreement and sole propriety interest regulations, the OIGA urges the commissioners to recognize the economic reality and analyze whether the regulation promotes or diminishes access to capital. OIGA strongly believes that economic decisions are within the prerogative of the tribal government and, short of violations of law, the NIGC should not seek to usurp that prerogative

Veritext/NJ Reporting Company

through regulation or administrative practice.

2.2

2.4

2.5

In addition to formal capital investment, the Oklahoma tribes and others around the country have created significant economic capital through technological innovation.

Therefore, as part of the primary principle of attracting and protecting capial, NIGC regulations should encourage rather than impede technological innovation. The tribal review of the MICS and tech standards should avoid barriers to entry while not compelling the obsolescence of existing investments.

Accordingly, the OIGA supports repeal of the five-year limitation on grandfather provisions in the tech standards.

Finally the OIGA tribes strongly urge the commission to remember that the NIGC budget is funded 100 percent by the tribes. We believe that the NIGC budgets and staffing should reflect tribal needs, not bureaucratic convenience. In particular we have seen in recent years the opening of the new offices in areas that did not need them, at great cost to the commssion and ultimately the tribes. It would be of much greater benefit to tribes, and

lead to better overall regulation if that funding supported more training for tribal regulators and operators. We encourage the commission to consider this idea and stand ready to collaborate in developing more training options.

2.2

2.4

2.5

When considering MICS and tech standards, we encourage the NIGC to remember the primary regularly authority of the tribes. We encourage the NIGC to remember the difference between standards which a tribe can meet by operating procedures reflective of particular tribal needs and an imposed, mandatory one size fits all operating procedure as standard. Class II gaming has numerous regulatory procedures and standards that are unique to it. We strongly believe that those rules dealing with Class II gaming require dialogue and focus specifically on them, and we stand ready to work with the commission on addressing those unique standards and procedures.

In conclusion, the OIGA applauds the new approach initiated by Chairwoman Stevens, Vice-Chairwoman Cochran, and Commissioner Little. The OIGA values its relationship with

Page 132

you and stands ready to work together to strengthen tribal sovereignty, honor the rule of law, and further increase the benefits of Indian gaming for our member tribes, their people and Oklahoma.

CHAIRWOMAN STEVENS: Thank you, sir. So, in closing, I want to say thank you on behalf of the commission. I want to say many, many thanks to the Chickasaw Nation for hosting today and being so gracious to open up their home to us. I also want to -- where I come from, I put my hands up and I say thank you to our staff without which we could not have organized and put this meeting together. I want to thank especially the tribal leaders and the staff that have traveled here today. Even if it's just to sit and listen and bring back the information to your tribe, I want to thank you all for attending. I know many of you have come a very long way to be here today, and I thank you for the time that you've taken. This is the beginning of a new relationship with the NIGC. This is the new NIGC. We're dealing with what we walked into, and we're doing it in a new way, and we want to talk with you as we move forward

so that tribes have a place at the table and they can help us set the agenda and that everyone has an ownership in what we do with the decisions we make. We can't be in a vacuum and make decisions. We need to have well-informed decisions. These meetings provide us that information. So thank you all. I look forward to an ongoing dialogue with everyone and this will be continued. This is not the end. This is the beginning. So thank you all and I wish you all safe travels home.
