Completion Notifications: Virtual attendees will receive individual completion E-mails for each course attended.

The NIGC staff is looking forward to meeting you virtually at these trainings. If you have any questions about the National Training Conference, please contact TrainingInfo@nigc.gov.

The NIGC Training Program

Course Descriptions

Compliance Track

Tribal Gaming Ordinances: Prior to tribes engaging in gambling, they need to obtain an ordinance approved by the NIGC Chairperson. Each ordinance issued is unique to each specific tribe, laying the foundation for gaming occurring on approved land. Your tribe's gaming ordinance should include the tools necessary to effectively regulate your tribe's gaming facilities. We will be working through this activity based training to identify some of your tribe's specific requirements and help you understand what your authority is as it relates to regulating gaming.

A Focus on the misuse of Gaming Revenues: MGR is a violation of the Indian Gaming Regulatory Act, there are five specific purposes of use of revenue. When used for something other than those purposes, violations occur. Let's take an activity filled hour to see how this may occur and what you can do to prevent it.

A Focus on Management without an Approved Contract: What are management contracts and how does TGRA play a role in insuring your operations doesn't cross the line into a violation of IGRA. Join us for an hour long activity filled training on managing without a contract and what red flags to look out for!

Background and Investigations: Let's take a close look the requirements for Part 556 and 558. In this activity filled hour we will look at the definition of the Key and Primary Management official and look at some job description that may or may not signify an individual is Key or Primary official. As well as submission requirements and timelines.

Licensing Files: This will be an hour long session on delving into the files held by the TGRA for at least three years after termination. We'll explore some of the most common areas of non-compliance and work collectively in groups to identify the elements of an investigative report.
